Presumed Dead, Navy SEAL Returns Home to Fight an Unseen Enemy in the Christian Romantic Suspense Novel, Returning to Eden, by Rebecca Hartt --Present Day, Virginia Beach, Virginia-- A dead man stands on her doorstep. When the Navy wrote off her MIA husband as dead, Eden came to terms with being a widow. But now, her Navy SEAL husband is staring her in the face. Eden knows she should be over-the-moon, but she isn't. Diagnosed with PTSD and amnesia, Navy SEAL Jonah Mills has no recollection of their fractured marriage, no memory of Eden nor her fourteen-year-old daughter. Still, he feels a connection to both. Unfit for active duty and assigned to therapy, Jonah knows he has work to do and relies on God, who sustained him during captivity, to heal his mind, body, and hopefully his family. But as the memories lurking in his wife's haunted eyes and behind his daughter's uncertain smile begin to return to him, Jonah makes another discovery. There is treachery in the highest ranks of his Team, treachery that not only threatens him but places his new-found family in its crosshairs. Publisher's Note: Fans of Ronie Kendig, Lynnette Eason, Dee Henderson as well as Marliss Melton, Irene Hannon, Susan May Warren and Colleen Coble, will enjoy this engrossing and heart-stirring series of redemption and rebirth. The Acts of Valor Series Returning to Eden Every Secret Thing Cry in the Wilderness Rising From Ashes Braving the Valley Rebecca Hartt is the nom de plume for an award-winning, best-selling author of a different name who, compelled by her faith, decided to spin suspenseful military romance where God plays a vital role in character motivation and plot. As a child, Rebecca lived in countries all over the world. She has been a military dependent for most of her life and knows first-hand the dedication and sacrifice required by those who serve. Living near the military community of Virginia Beach, Rebecca is constantly reminded of the peril and uncertainty faced by U.S. Navy SEALs, many of whom testify to a personal and profound connection with their Creator. Their loved ones, too, rely on God for strength and comfort. These men of courage and women of faith are the subjects of Rebecca Hartt's enthusiastically received Acts of Valor romantic suspense series. This Herbal Medicine Field Guide documents the herbal remedies used at the Eden Herbal Medical Clinic in Doma, Zimbabwe, Africa. More than 20,000 patients have benefitted from Judy Ervine's expertise as a State Registered Nurse and a Registered Herbal Practitioner. Judy writes from more than twenty years' experience with herbal medicine in a part of the world where western medicines are seldom available. This field guide is a compilation of the effective herbal remedies used in this remarkable Clinic. Following his reluctant retirement, Captain James Kirk is offered an irresistible adventure by a mysterious young woman that will force Kirk to confront the fragile peace between the Federation and the Klingons Seeking Eden promotes an awareness of, and appreciation for, Georgia's rich garden heritage. Updated and expanded here are the stories of nearly thirty designed landscapes first identified in the early twentieth-century publication Garden History of Georgia, 1733-1933. Seeking Eden records each garden's evolution and history as well as each garden's current early twenty-first-century appearance, as beautifully documented in photographs. Dating from the mid-eighteenth to the early twentieth centuries, these publicly and privately owned gardens include nineteenth-century parterres, Colonial Revival gardens, Country Place-era landscapes, rock gardens, historic town squares, college campuses, and an urban conservation garden. Seeking Eden explores the significant impact of the women who envisioned and nurtured many of these special places; the role of professional designers, including J. Neel Reid, Philip Trammel Shutze, William C. Pauley, Robert B. Cridland, the Olmsted Brothers, Hubert Bond Owens, and Clermont Lee; and the influence of the garden club movement in Georgia in the early twentieth century. Not long after landing on Eden, un-inhabited planet, every human made artifact disappears. When the colony goes silent and fails to answer any communications Earth's government goes into a panic and turns to the Extrapolators, a group of people who have been trained to question every belief. A probationary Extrapolator is sent to Eden in the expectation that he will graduate into the ranks of the Extrapolators if he solves whatever problems he finds there. Even with his special training he is not prepared for the nature of the disaster that struck the colony, but eventually by an entirely new way of thinking he finds the key to what has happened. This fast-paced action novel is set in a future where the world has been almost destroyed. Like the award-winning novel *Freak the Mighty*, this is Philbrick at his very best. It's the story of an epileptic teenager nicknamed Spaz, who begins the heroic fight to bring human intelligence back to the planet. In a world where most people are plugged into brain-drain entertainment systems, Spaz is the rare human being who can see life as it really is. When he meets an old man called Ryter, he begins to learn about Earth and its past. With Ryter as his companion, Spaz sets off an unlikely quest to save his dying sister -- and in the process, perhaps the world. There are twenty million acres of lawns in North America. In their current form, these unproductive expanses of grass represent a significant financial and environmental cost. However, viewed through a different lens, they can also be seen as a tremendous source of opportunity. Access to land is a major barrier for many people who want to enter the agricultural sector, and urban and suburban yards have huge potential for would-be farmers wanting to become part of this growing movement. *The Urban Farmer* is a comprehensive, hands-on, practical manual to help you learn the techniques and business strategies you need to make a good living growing high-yield, high-value crops right in your own backyard (or someone else's). Major benefits include: Low capital investment and overhead costs Reduced need for expensive infrastructure Easy access to markets Growing food in the city means that fresh crops may travel only a few blocks from field to table, making this innovative approach the next logical step in the local food movement. Based on a scalable, easily reproduced business model, *The Urban Farmer* is your complete guide to minimizing risk and maximizing profit by using intensive production in small leased or borrowed spaces. Curtis Stone is the owner/operator of Green City Acres, a commercial urban farm growing vegetables for farmers markets, restaurants, and retail outlets. During his slower months, Curtis works as a public speaker, teacher, and consultant, sharing his story to inspire a new generation of farmers. In their austere desert monasteries Coptic monks maintain a tradition of Christianity that extends back to St. Anthony and the ancient Desert Fathers. Father Gruber's journey began almost accidentally as part of his doctoral research, but it became much more. His account of his year's sojourn - entertaining, poignant, and spiritually challenging - opens a window on a mysterious world, saturated in prayer and silence, that functions as it always has to awaken hearts to the mercy and power of God. Explains how to use a system of layered mulch materials, including newspaper, leaves, and grass clippings, to provide a nutrient-rich base for healthy gardens and robust flowers, herbs, vegetables, and fruits Unexpected allies It's been more than a decade since Nicole Cavanagh's mother was found dead. But the people of Koomera Crossing are still talking about the rift that her death caused between the Cavanaghs and the McClellands—two powerful and formerly friendly families. Now Nicole has come home, determined to find out the truth about her mother's death. Who would have thought that her one ally would be a McClelland? "After fourteen-year-old Eden is raped by her brother's best friend, she knows she'll never be the way she used to be"-- A history of the rise and fall of baseball in America challenges popular beliefs about the game's evolution while revealing how it reflects popular culture, citing the roles of such contributing factors as gambling and religion. In a volume devoted to the first generation of Carolina Huguenots, Bertrand Van Ruymbeke describes in detail their gradual transformation from French refugees to South Carolina planters."--Jacket. This revised edition of Carolyn Merchant's classic *Reinventing Eden* has been updated with a new foreword and afterword. Visionary quests to return to the Garden of Eden have shaped Western Culture. This book traces the idea of rebuilding the primeval garden from its origins to its latest incarnations and offers a bold new way to think about the earth. A new edition of the classic guide to herbal medicine by a renowned herbalist furnishes a comprehensive overview of natural healing methods, including an emphasis on herbal remedies and a vegetarian diet that promotes a healing approach advocating a return to natural habits of living. An exploration of our fall from the pinnacle of human evolution 200,000 years ago and how we can begin our return • Explores recent neurological and psychological research on the brain and the role of plant biochemistry in human brain expansion • Explains how humanity's prehistoric diet change led to a neurodegenerative condition characterized by aggression and a fearful perception of the world • Outlines a strategy of raw foods, tantric sexuality, shamanic practices, and entheogens to reverse our mental degeneration and restore our advanced abilities Over a period of a million years the human brain expanded at an increasingly rapid rate, and then, 200,000 years ago, the expansion abruptly stopped. Modern science has overlooked this in order to maintain that we are at the pinnacle of our evolution. However, the halt in brain expansion explains not only recently uncovered anomalies within the human brain but also the global traditions of an earthly paradise lost and of humanity's degeneration from our original state of perpetual wonder and joy. Drawing on more than 20 years of research, authors Tony Wright and Graham Gynn explore how our modern brains are performing far below their potential and how we can unlock our higher abilities and return to the euphoria of Eden. They explain how for millions of years early forest-dwelling humans were primarily consuming the hormone-rich sex organs of plants--fruit--each containing a highly complex biochemical cocktail evolved to influence DNA transcription, rapid brain development, and elevated neural and pineal gland activity. Citing recent neurological and psychological studies, the authors explain how the loss of our symbiotic fruit-based diet led to a progressive neurodegenerative condition characterized by aggressive behaviors, a fearful perception of the world, and the suppression of higher artistic, mathematical, and spiritual abilities. The authors show how many shamanic and spiritual traditions were developed to counteract our decline. They outline a strategy of raw foods, tantric sexuality, shamanic practices, and entheogen use to reverse our degeneration, restore our connection with the plant world, and regain the bliss and peace of the brain of Eden. A haunting and luminous novel that explores the dark secrets lurking beneath the stunning natural beauty of a dying timber town. A mysterious beachcomber appears one day on the coastal bluffs near the small town of Carverville, whose best days are long behind it. Who is he, and why has he returned after nearly forty years? Carverville's prodigal son, James, serendipitously finds work at the Eden Seaside Resort & Cottages, a gentrified motel, but soon finds his homecoming taking a sinister turn when he and a local teenager make a gruesome discovery, which force him to reckon with the ghosts of his past—and the dangers of the present. Rumors, distrust, and conspiracies spread among the townsfolk, all of them seemingly trapped in their claustrophobic and isolated world. But is there something even more sinister at work here than the mere fear of outsiders? In *The Gardener of Eden*, David Downie weaves an intricate and compelling narrative of redemption, revenge, justice, and love—and the price of secrecy—as a community grapples with its tortured past and frightening future Now in its expanded, updated revised edition, this is the original classic text (with more than 5-million copies sold) that helped create the natural foods industry. It remains today one of the major texts on herbs, natural diet and lifestyle and wholistic health. Can you really have a productive garden without plowing, hoeing, weeding, cultivating, and all the other bothersome rituals that most gardeners suffer through every growing season? "Sure," says Ruth Stout, a prolific author and writer at 80 years young. The reason that Ruth can throw away her spade and hoe and do her gardening from a couch is a year-round mulch covering, 6 to 8 inches thick, that covers her garden like a blanket. Thousands of curious gardeners have visited her Redding, Connecticut garden, including university scientists and horticulture experts. The experts have been dazzled by the technique used by the queen of mulch! But the results of 41 years of gardening experience can't be denied. The

Ruth Stout No-Work Gardening Book gives Ruth's unique advice on growing techniques and tells how she has escaped the bugaboos that haunt most gardeners. Her poison-free method of combating slugs and other insects, her scheme for growing tasty vegetables all year, her method of foiling both drought and frost -- these and many other growing secrets are revealed -- secrets that have brought this perky organic gardener season after season of growing pleasure. If you're tired of being a slave to your garden, yet still want to enjoy it without the bother of sprays, weeding, hoeing or other toilsome garden chores, The Ruth Stout No-Work Garden Books has the information you need. It's completely tested gardening method, perfected during more than 40 years experience and reported in the pages of Organic Gardening magazine, eliminates gardening strain and toil, and does it organically with no dangerous chemical fertilizers or toxic sprays. Take it easy. Put nature to work in your garden. Return to Eden is a novel by Harry Harrison, author of innumerable science fiction novels and stories. The bold erotic masterpiece by #1 New York Times bestselling author Anne Rice writing as Anne Rampling. They call her the Perfectionist. A stunning, mysterious, and fearless sexual adventurer, Lisa is founder and supreme mistress of The Club—an exclusive island resort where forbidden fantasy meets willing flesh. Here eager participants who can afford life's most exquisite luxuries can experience the breathtaking pleasures of surrender and submission. Here nothing is taboo. A thrill-seeking photojournalist, Elliott risks his life daily in the most dangerous, war-torn regions on Earth. Now he has come to Paradise to explore his most savage and vulnerable sexual self, committed to the ultimate plunge into personal risk. Together, their journey to the limits of erotic pleasure will take them farther than they ever dreamed they'd go . . . Here is a revolutionary approach for heating rooms and generating hot water. Author Gaelan Brown has worked with engineers and compost scientists to refine methods of composting that can heat greenhouses, barns, buildings, and hot water, all without combustion. It seems almost too good to be true: make high-value organic compost while generating reliable combustion-free heat. But it works, and this book is your practical introduction. With detailed case studies of large scale engineered systems and plans for constructing small DIY systems, you'll find step-by-step illustrations and photos to guide you through the process. A review of calculations to help you estimate the heating capabilities of various approaches and other planning tools make this book invaluable for compost heat recovery on any scale. Reproduction of the original: Driven Back to Eden by E.P. Roe A "certainly weird . . . strangely wonderful . . . [and] often irresistible" search to find the real Garden of Eden (The New York Times Book Review). Where, precisely, was God's Paradise? St. Augustine had a theory. So did medieval monks, John Calvin and Christopher Columbus. But when Darwin's theory of evolution changed our understanding of human origins, shouldn't the desire to put a literal Eden on the map have faded away? Not so fast. This "gloriously researched, pluckily written historical and anecdotal assay of humankind's age-old quixotic quest for the exact location of the Biblical garden" (Elle) explores an obsession that has consumed scientists and theologians alike for centuries. To this day, the search continues, taken up by amateur explorers, clergymen, scholars, engineers and educators—romantic seekers all who started with the same simple-sounding Bible verses, only to end up at a different spot on the globe: Sri Lanka, the Seychelles, the North Pole, Mesopotamia, China, Iraq—and Ohio. Inspired by an Eden seeker in her own family, "Wilensky-Lanford approaches her subjects with respect, enthusiasm and conscientious research" (San Francisco Chronicle) as she traverses a century-spanning history provoking surprising insights into where we came from, what we did wrong, and where we go from here. And it all makes for "a lively journey" (Kirkus Reviews). Growing Food God's Way is a compelling biography of veteran gardener Paul Gautschi. Known world-wide for his connection with God's world of nature, this authorized work explores the man and his wildly successful garden and orchard...while applying revealed principles to our daily lives as well. Home gardeners in 208 countries agree that you can grow better produce with much less cost and less work if you do it God's way. CAUTION: this book may rock your worldview! Principles and farm-tested practices for no-till market gardening--for healthier, more productive soil! From the host of the popular The No-Till Market Garden Podcast—heard around the world with over 850k downloads! Discovering how to meet the soil's needs is the key task for every market gardener. In this comprehensive guide, Farmer Jesse Frost shares all he has learned through experience and experimentation with no-till practices on his home farm in Kentucky and from interviews and visits with highly successful market gardeners in his role as host of The No-Till Market Garden Podcast. The Living Soil Handbook is centered around the three basic principles of no-till market gardening: Disturb the soil as little as possible Keep it covered as much as possible Keep it planted as much as possible. Farmer Jesse then guides readers in applying those principles to their own garden environment, with their own materials, to meet their own goals. Beginning with an exploration of the importance of photosynthesis to living soil, Jesse provides in-depth information on: Turning over beds Using compost and mulch Path management Incorporating biology, maintaining fertility Cover cropping Diversifying plantings through intercropping Production methods for seven major crops Throughout, the book emphasizes practical information on all the best tools and practices for growers who want to build their livelihood around maximizing the health of their soil. Farmer Jesse reminds growers that "as possible" is the mantra for protecting the living soil: disturb the soil as little as you possibly can in your context. He does not believe that growers should anguish over what does and does not qualify as "no-till." If you are using a tool to promote soil life and biology, that's the goal. Jesse's goal with The Living Soil Handbook is to provide a comprehensive set of options, materials, and field-tested practices to inspire growers to design a soil-nurturing no-till system in their unique garden or farm ecosystem. "[A] practical, informative debut. . . Gardeners interested in sustainable agriculture will find this a great place to start."—Publishers Weekly "Frost offers a comprehensive, science-based, sympathetic, wholly practical guide to soil building, that most critical factor in vegetable gardening for market growers and home gardeners alike. A gift to any vegetable plot that will keep on giving."—Booklist (starred review) RETURN TO EDEN is an exploration of one man's and one country's journey from the devastation of war through recovery to healing. Tucker Smallwood served in the U.S. Army Infantry, Airborne from 1967-1970. He commanded a Mobile Advisory Team during the Vietnam War and was severely wounded in action. After recovering from his injuries, Smallwood moved to New York to study acting, establishing a career as a performer on Broadway (Mahalia), in film (Contact, The Cotton Club) and on television (The X-Files, Space: Above and Beyond). Smallwood's essays reflecting upon his military experience have appeared in magazines, but this is the first published collection. There are more than fifty photographs, many from his tour of duty and from his return in 2004. RETURN TO EDEN is also available in audio book formats. A masterpiece of Biblical scope, and the magnum opus of one of America's most enduring authors, in a commemorative hardcover edition In his journal, Nobel Prize winner John Steinbeck called East of Eden "the first book," and indeed it has the primordial power and simplicity of myth. Set in the rich farmland of California's Salinas Valley, this sprawling and often brutal novel follows the intertwined destinies of two families—the Trasks and the Hamiltons—whose generations helplessly reenact the fall of Adam and Eve and the poisonous rivalry of Cain and Abel. The masterpiece of Steinbeck's later years, East of Eden is a work in which Steinbeck created his most mesmerizing characters and explored his most enduring themes: the mystery of identity, the inexplicability of love, and the murderous consequences of love's absence. Adapted for the 1955 film directed by Elia Kazan introducing James Dean, and read by

thousands as the book that brought Oprah's Book Club back, *East of Eden* has remained vitally present in American culture for over half a century. *Taking Back Eden* is the gripping tale of an idea—that ordinary people have the right to go to court to defend their environment—told through the stories of lawsuits brought in eight countries around the world. Starting in the United States in the 1960's, this idea is now traveling the planet, with impacts not just on imperiled environments but on systems of justice and democracy. It has brought people back into the question of governing the quality of their lives. Author Oliver Houck describes the sites under contention in their place and time, the people who rose up, their lawyers, strategies, obstacles, setbacks and victories. Written for general readers, students, and lawyers alike, *Taking Back Eden* tells the stories of a lone fisherman intent on protecting the Hudson River, a Philippine lawyer boarding illegal logging ships from the air, the Cree Indian Nation battling for its hunting grounds, and a civil rights attorney who set out to save the Taj Mahal. The cases turn on Shinto and Hindu religions, dictatorships in Greece and Chile, regime changes in Russia, and on a remarkable set of judges who saw a crisis and stepped up to meet it in similar ways. Spontaneously, without communication among each other, their protagonists created a new brand of law and hope for a more sustainable world. How did the replication bomb we call "life" begin and where in the world, or rather, in the universe, is it heading? Writing with characteristic wit and an ability to clarify complex phenomena (the *New York Times* described his style as "the sort of science writing that makes the reader feel like a genius"), Richard Dawkins confronts this ancient mystery. *God's Story Will End Better than It Began* . . . Experienced Bible teacher Nancy Guthrie traces 9 themes throughout the Bible, revealing how God's plan for the new creation will be far more glorious than the original. But this new creation glory isn't just reserved for the future. The hope of God's plan for his people transforms everything about our lives today. *Getting Back into the Garden of Eden* studies the story of the Garden of Eden in-depth from an historical-psychological perspective for the first time. It explores how the historical experiences of the Hebrew people became transformed into the psychologically meaningful and therefore symbolic characters and situations in the first three chapters of the Genesis story. It examines the possibilities of the placement and inspiration for the Garden from the oases of the Arabian desert and the advanced irrigation culture of the areas of the Tigris and Euphrates rivers. "...set[s] forth his method of natural self healing based on herbs, a diet that used no meat, dairy products, or eggs, and a life in harmony with the laws of health and nature. He opposed the use of sugar, spices, pepper, mustard, vinegar, and fermented foods. He recommended the use of soymilk in numerous healing diets and considered it far better than cow's milk. " -- [www.SoyinfoCenter.com](http://www.SoyinfoCenter.com). Sixty-five million years ago, a disastrous cataclysm eliminated three quarters of all life on Earth. Overnight, the age of dinosaurs ended. The age of mammals had begun. But what if history had happened differently? What if the reptiles had survived to evolve intelligent life? In *West of Eden*, bestselling author Harry Harrison has created a rich, dramatic saga of a world where the descendents of the dinosaurs struggled with a clan of humans in a battle for survival. Here is the story of Kerrick, a young hunter who grows to manhood among the dinosaurs, escaping at last to rejoin his own kind. His knowledge of their strange customs makes him the humans' leader...and the dinosaurs' greatest enemy. Rivalling Frank Herbert's *Dune* in the majesty of its scope and conception, *West of Eden* is a monumental epic of love and savagery, bravery and hope.
