Offered here for the first time in English is a selection of the most important and characteristic works of Valentin Weigel (1533-88). Readers will find in this volume an introduction to the life, times, and writings of Weigel, a German teacher and theologian who articulated a variant of the Protestant Reformation known as Spiritualism: a form of dissent emphasizing spiritual or inner independence from rules, ceremonies, and the visible or organized church. Together, these works present the heart of this reformer's thought, which championed tolerance and individual conscience in an age of confessional hatred and religious war. Weigel's writings are Spiritualist theory at its most accurate. They complete a missing chapter in the history of mystical literature. Book jacket. Usability Professionals Workshop deals with the practical applications of human-machine interaction research. It is organized by the German ACM specialty section of the UPA (Usability Professionals Association). The volume presents the latest research findings through case studies and practice reports along with in-depth discussions. Major conduction blocks utilizing local anesthetics or opiates are finding ever increasing applications in daily routine. However, two serious drawbacks are associated with their use: hypotension during surgery and the development of tolerance in long-term epidural analgesia. When opiates are injected epidurally or intrathecally, numerous side effects such as itching, nausea and vomiting, or respiratory depression have been reported. The pathophysiology of complications arising during a major conduction block and measures to prevent them were discussed by 19 experts at the 4th International Symposium at DÜsseldorf. This volume contains 21 papers presented on three topics: 1. tachyphylaxis in long-term epidural anesthesia, 2. hypotension due to epidural and spinal anesthesia, and 3. effects and dangers of epidural and intrathecal opiates. With regard to the safety of our patients during anesthesia, current practices of preventing complications were evaluated, and preliminary guidelines for a more rational approach toward prevention and treatment based on a knowledge of pathophysiologic mechanisms were developed. It is our hope that the anesthesiologist will profit from the discussion of regional anesthesia contained in this volume, many aspects of which have never before been presented in such detail. Das vorliegende Buch präsentiert die Beiträge des 7. Workshops, der im Juli 1999 vom Lehrstuhl für Dienstleistungsmanagement an der Universität Bayreuth veranstaltet wurde. Die Beiträge weisen eine breite Palette von Problemen im Dienstleistungsmarketing auf. What role did classical

rhetoric play in the writing of the New Testament? What role does classical and modern rhetoric play in interpreting the New Testament today? What role should classical and modern rhetoric play in New Testament interpretation? These and related questions are asked in this collection of over twenty essays originally delivered as papers at the 1992 Heidelberg Conference on Rhetorical Criticism of Biblical Documents. This conference, the first of several scheduled to address fundamental rhetorical issues of increasing importance in New Testament study, drew scholars from three continents and over fourteen countries, making it a truly international scholarly event and this a truly cosmopolitan publication. The authors' varying contexts resulted in a lively and challenging discussion well reflected in this volume's essays. The first part discusses rhetoric in the light of extended interpretation of a variety of New Testament texts. Luke and Acts, most of Paul's letters, and other New Testament documents are scrutinized using various rhetorical categories. In the second part, questions of rhetoric and methodology are raised. New approaches are tested in a number of essays that push the boundaries of traditional rhetorical study. These essays provide an excellent sampling of some of the major work being done in rhetorical study of the New Testament and suggest several avenues for future research. First multi-year cumulation covers six years: 1965-70. In dieser Festschrift werden verschiedene aktuell diskutierte Aspekte der pädagogisch-psychologischen Forschung betrachtet. Die empirische Verankerung bildet die gemeinsame Wurzel aller Beiträge, welche unter anderem Themen wie Selbstkonzept, Hochbegabung, Training räumlichen Denkens, Schulübergang, Prüfungsangst, Koedukation, neue Medien, Lernen, Leistung sowie Beratung behandeln. Ergänzt werden diese empirischen Arbeiten um Übersichtsbeiträge zur Lehr-Lern-Forschung und ATI-Effekten. Aus dem Inhalt: - kritische Diskussion von fünf Dogmen der Lehr- und Lernforschung; - ATI-Effekte beim Lernen mit neuen Medien; - Zur triangulativen Verknüpfung quantitativer und qualitativer Methoden; - Training räumlicher Fähigkeiten; - Der Wechsel auf die weiterführende Schule: Längsschnittstudie über Stresserleben und psychischer Anpassung der SchülerInnen; - Beratungsanlässe in der Begabungsdiagnostischen Beratungsstelle BRAIN; - mono- und koedukative Vergleichskontexte als Ursache unterschiedlicher Leistung von Mädchen in Mathematik; - Geschlechtsunterschiede im Allgemeinwissen von GymnasiastInnen und Studierenden; - Beziehungen zwischen Schulleistungen, schulischen Selbstkonzepten und Prüfungsängsten im Rahmen des I/E-Modells; - Betriebliche Berufsausbildung vor dem Studium: Auswirkungen auf Studienmotivation, Lernstrategien und Lernleistungen; - Selbstständiges Lernen aus der Sicht der Betroffenen; - Detailanalysen zur Persistenz mithilfe des Repräsentativen Designs. This volume is a collection of essays by the author covering a period of twenty years and the most important groups of text in the New Testament. They are connected to each other by linking the interests and stimulus of modern linguistics and literary science to traditional historical-critical methods. The UK became a net importer of natural gas in 2004 and by 2020 will import up to 90% of its requirements, leaving it vulnerable to increasing energy bills and risk of disruption to supply. New pipelines to Europe and improvements to interconnectors will meet some demand, but Government recognises the need for increased gas storage capacity: best met by the construction of underground storage facilities. Energy security has also raised the likelihood of a new generation of coal-fired power-stations, which to be environmentally viable, will require clean-coal technologies with near-zero greenhouse gas emissions. A key element of this strategy will be underground CO2 storage. This volume reviews the technologies and issues involved in the underground storage of natural gas and CO2, with examples from the UK and overseas. The potential for underground storage of other gases such as hydrogen, or compressed air linked to renewable sources is also reviewed. The series Handbooks of Linguistics and Communication Science is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages, but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction. A keyword listing of serial titles currently received by the National Library of

Medicine. Escape toxic prescription pain drugs, capture your flexibility and rejuvenate your ability to be active and shed years of pain with systemic oral enzymes. Enzymes are a completely natural substance that many health experts call the "medicine of the future." If you are suffering chronic pain from arthritis, cancer, sports injuries or heart disease-if you suffer circulatory problems, tinnitus, fibrocystic breast disease, prostatitis, sinusitis, shingles, ulcerative colitis, Crohn's disease, thrombophlebitis or other inflammatory-related conditions, systemic oral enzymes will prove to be the medicine your body craves now. A practical guide to the art and technique of lighting for the stage, this book explains the complex mixture of craft, collaboration and creativity behind successful lighting design. The designer paints with light - revealing form and composing a living picture from collections of objects and bodies in a given space. This handbook for professional practice walks you through how to achieve this, from first concept to development of design ideas, planning to realisation and, finally, public performance. Now fully revised, this second edition of Nick Moran's Performance Lighting Design has been brought up to date to consider advances made in the technology used for lighting design for live performance. Alongside this, Moran introduces new concepts and ways of working; includes a section on analysing the finished design; and discusses recent research into contemporary lighting practice, addressing emerging trends, particularly for drama. Combining practical information with aesthetic considerations, Performance Lighting Design is the ideal book for students and practitioners of stage lighting working on the contemporary stage. As founder of the Moravian Church, Nicolas Ludwig von Zinzendorf and Pottendorf (1700-1760) is considered one of the central figures of European pietism. International contributions to this work focus on current research on Zinzendorf's classifications of church, theology, and literature, as well as on important developments of his life and work. External relationship to the Bohemians and Schwenckfelders, to the Lutheran critics and the English, as well as to Goethe and Karl Barth are addressed. The central commonality of all contributions is Zinzendorf's effect on historical development and his relevance in today's times. German text. Aspekte Der Sowjetrussischen Lexikographie: Bersetungen, Abstracts, Bibliographische Angaben. This first English-language consideration of Valentin Weigel, an important but neglected figure in German intellectual history, examines his life and his writings on tolerance. The New Yearbook for Phenomenology and Phenomenological Philosophy provides an annual international forum for phenomenological research in the spirit of Husserl's groundbreaking work and the extension of this work by such figures as Scheler, Heidegger, Sartre, Levinas, Merleau-Ponty and Gadamer. Mit diesem Band der Schriften zur Unternehmensführung legen die Schüler des Herausgebers und Gründers dieser Reihe einige Arbeiten zu aktuellen Ergebnissen ihrer wissenschaftlichen Tätigkeit auf dem Gebiet der unternehmerischen Planung vor. Damit soll die mit Band 25 begonnene Tradition gepflegt werden, betriebswirtschaftliche Forschungsergebnisse einem größeren Leserkreis zur Kenntnis zu bringen. Die inzwischen an verschiedenen deutschen Universitäten als Hochschul lehrer wirkenden Schüler von Prof. Dr. H. J. Jacob wollen mit ihren gemeinsam vorgelegten Beiträgen zugleich ihrem Lehrer den tiefempfundenen Dank für die Förderung und Unterstützung ihres wissenschaftlichen Werdegangs zum Ausdruck bringen. Mit diesen

Arbeiten stellen sich die Schüler in die verdienstvolle Tradition ihres Lehrers: Sie fühlen sich der problemorientierten, quantitativen Betriebswirtschaftslehre verpflichtet und nehmen auch für sich in Anspruch, praxisbezogene Fragen aufzugreifen und Lösungsvorschläge im Sinne der Unternehmensführung zu erarbeiten. Unternehmensplanung Mit dem Übersichtsbeitrag über computergestützte Unternehmensplanung als aktuelle Aufgabe des wird ein für viele Firmen, insbesondere mit internationalem Betätigungs Managementfeld, außerordentlich bedeutsamer und zugleich aktueller Aufgabenbereich des Managements beleuchtet. Wie vor allem amerikanische Untersuchungen zeigen, besteht gerade bei europäischen Gesellschaften auf diesem Gebiet ein inzwischen offensichtlich erkennbarer Nachholbedarf. Die weiterhin verbesserten Anwendungsbedingungen der Computersysteme zur Lösung von planerischen Aufgaben schaffen hier günstige Voraussetzungen für eine erfolgreiche Beschäftigung mit weitreichenden, die Zukunftsentwicklung einer Unternehmung bestimmenden Planungsansätzen. Design has long expressed and established itself as an independent research competence - a fact that also companies, institutions and politicians have come to acknowledge. What is still needed, however, is a stronger public platform for design to confidently reflect upon this process and to establish and communicate the specific innovative and experimental dimension of design research. For this reason, BIRD, the Board of International Research in Design, has developed the New Experimental Research in Design / NERD format. The edited conference contributions of twelve young researchers from all over the world provide an impressive and diverse and insightful range of intelligent and inspiring approaches in design research, giving rise to further debate and action in the rapidly evolving field. In this volume the philosophy of perception and observation is discussed by leading philosophers with implications in the philosophy of mind, in epistemology, and in philosophy of science. In the last years the philosophy of perception underwent substantial changes and new views appeared: the intentionality of perception has been contested by relational theories of perception (direct realism), a richer view of perceptual content has emerged, new theories of intentionality have been defended against naturalistic theories of representation (e. g. phenomenal intentionality). These theoretical changes reflect also new insights coming from psychological theories of perception. These changes have substantial consequences for the epistemic role of perception and for its role in scientific observation. In the present volume, leading philosophers of perception discuss these new views and show their implications in the philosophy of mind, in epistemology and in philosophy of science. A special focus is laid on Franz Brentano and Ludwig Wittgenstein. A reference volume for all scholars and students of the history, psychology and philosophy of perception, and cognitive science. This book constitutes the refereed proceedings of the Second European Conference on Technology Enhanced Learning, EC-TEL 2007, held in Crete, Greece in September 2007. The papers presented were carefully reviewed and selected from 116 submissions. The conference provides a unique forum for all research related to technology-enhanced learning, as well as its interactions with knowledge management, business processes and work environments.
