Conservation of Modern Architecture Mar 01 2020 The importance of protecting significant buildings from decay and destruction would seem to be undeniable. Yet whilst the majority of buildings of merit constructed before the Second World War have been highlighted as worthy of protection there is much indifference, and in some cases hostility towards many important post-war buildings. These deserve to receive wider formal recognition but in many cases continue to be mistreated or even demolished. This book examines many of the philosophical and practical issues surrounding the conservation of modern buildings and also the problems faced by building practitioners in dealing with buildings constructed in a wider range of styles and materials than at any other time. Climate change in particular has forced change in the way in which we think about buildings, with the pressures to address issues of energy efficiency becoming more urgent and likely to have consequences that may alter the perceived architectural and historic interest of modern and traditional buildings alike.

Hokusai Nov 08 2020 An acknowledged master during his lifetime, Hokusai created sublime works during the last thirty years of his life, right up to his death at the age of ninety. Exhibitions since the 1980s have presented his long career as a chronological sequence. This publication, which will coincide with an exhibition at the British Museum, takes a fresh approach based on innovative scholarship: thematic groupings of late works are related to the major spiritual and artistic quests of Hokusai's life. Hokusai's personal beliefs are contemplated here through analyses of major brush paintings, drawings, woodblock prints, and illustrated books. The publication gives due attention to the contribution of Hokusai's daughter Eijo (Oi), also an accomplished artist. Hokusai continually explored the mutability and minutiae of natural phenomena in his art. His late subjects and styles were based on a mastery of eclectic Japanese, Chinese, and European techniques and an encyclopedic knowledge of nature, myth, and history. *Hokusai: Beyond the Great Wave* draws on the finest collections of his work in Japan and around the world, making this the most important publication for years on Hokusai and a uniquely valuable overview of the artist's late career.

Painting in Stone Jan 11 2021 A sweeping history of premodern architecture told through the material of stone Spanning almost five millennia, *Painting in Stone* tells a new history of premodern architecture through the material of precious stone. Lavishly illustrated examples include the synthetic gems used to simulate Sumerian and Egyptian heavens; the marble temples and mansions of Greece and Rome; the painted palaces and polychrome marble chapels of early modern Italy; and the multimedia revival in 19th-century England. Poetry, the lens for understanding costly marbles as an artistic medium, summoned a spectrum of imaginative associations and responses, from princes and patriarchs to the populace. Three salient themes sustained this "lithic imagination": marbles as images of their own elemental substance according to premodern concepts of matter and geology; the perceived indwelling of astral light in earthly stones; and the enduring belief that colored marbles exhibited a form of natural—or divine—painting, thanks to their vivacious veining, rainbow palette, and chance images.
