Nutritional Oncology Jun 12 2021 Nutritional oncology is an increasingly active interdisciplinary field where cancer is investigated as both a systemic and local disease originating with the changes in the genome and progressing through a multi-step process which may be influenced at many points in its natural history by nutritional factors that could impact the prevention of cancer, the quality of life of cancer patients, and the risk of cancer recurrence in the rapidly increasing population of cancer survivors. Since the first edition of this book was published in 1999, the idea that there is a single gene pathway or single drug will provide a cure for cancer has given way to the general view that dietary/environmental factors impact the progression of genetic and cellular changes in common forms of cancer. This broad concept can now be investigated within a basic and clinical research context for specific types of cancer. This book attempts to cover the current available knowledge in this new field of nutritional oncology written by invited experts. This book attempts to provide not only the theoretical and research basis for nutritional oncology, but will offer the medical oncologist and other members of multidisciplinary groups treating cancer patients practical information on nutrition assessment and nutritional regimens, including micronutrient and phytochemical supplementation. The editors hope that this volume will stimulate increased research, education and patient application of the principles of nutritional oncology. NEW TO THIS EDITION: * Covers hot new topics of nutrigenomics and nutrigenetics in cancer cell growth * Includes new chapters on metabolic networks in cancer cell growth, nutrigenetics and nutrigenomics * Presents substantially revised chapters on breast cancer and nutrition, prostate cancer and nutrition, and colon cancer and nutrition * Includes new illustrations throughout the text, especially in the breast cancer chapter * Includes integrated insights into the unanswered questions and clearly defined objectives of research in nutritional oncology * Offers practical guidelines for clinicians advising malnourished cancer patients and cancer survivors on diet, nutrition, and lifestyle * Provides information on the role of bioactive substances, dietary supplements, phytochemicals and botanicals in cancer prevention and treatment *Data Analytics Applications in Emerging Markets* May 12 2021 This book analyzes the impact of technology in emerging markets by considering conditions and the history of how it has changed the way of working

and market development in such contexts. The book delves into key areas such as fintech enterprises, artificial intelligence, pension funds, stock markets, and energy markets though applied studies and research. This book is a useful read for practitioners and scholars interested in how technology has and continues to change the way in which development is defined and achieved, particularly in emerging markets.

The Theory of Corporate Finance Jan 26 2020 The past twenty years have seen great theoretical and empirical advances in the field of corporate finance. Whereas once the subject addressed mainly the financing of corporations--equity, debt, and valuation--today it also embraces crucial issues of governance, liquidity, risk management, relationships between banks and corporations, and the macroeconomic impact of corporations. However, this progress has left in its wake a jumbled array of concepts and models that students are often hard put to make sense of. Here, one of the world's leading economists offers a lucid, unified, and comprehensive introduction to modern corporate finance theory. Jean Tirole builds his landmark book around a single model, using an incentive or contract theory approach. Filling a major gap in the field, *The Theory of Corporate Finance* is an indispensable resource for graduate and advanced undergraduate students as well as researchers of corporate finance, industrial organization, political economy, development, and macroeconomics. Tirole conveys the organizing principles that structure the analysis of today's key management and public policy issues, such as the reform of corporate governance and auditing; the role of private equity, financial markets, and takeovers; the efficient determination of leverage, dividends, liquidity, and risk management; and the design of managerial incentive packages. He weaves empirical studies into the book's theoretical analysis. And he places the corporation in its broader environment, both microeconomic and macroeconomic, and examines the two-way interaction between the corporate environment and institutions. Setting a new milestone in the field, *The Theory of Corporate Finance* will be the authoritative text for years to come.

Cost of Capital Aug 15 2021 An authoritative text on cost of capital for both the nonprofessional and the valuation expert -- now revised and expanded In endeavoring to practice sound corporate finance, there is perhaps nothing so critical, nor slippery, as cost of capital estimation. The second edition of *Cost of Capital: Estimation and Applications* combines a state-of-the-art treatise on cost of capital estimation with an accessible introduction for the nonprofessional. This comprehensive yet usable guide begins with an exposition of basic concepts understandable to the lay person and proceeds gradually from simple applications to the more complex procedures commonly found in the marketplace. New features of the revised and expanded Second Edition include chapters on Economic Value Added (EVA) and reconciling cost of capital in the income approach with valuation multiples in the market approach, as well as expanded coverage of cost of capital in the courts and handling discounts for marketability. *Cost of Capital* remains an incomparable resource for all parties interested in effective business valuation.

Ver 1.0 Workshop Proceedings Oct 05 2020 *Ver 1.0* was a three-day workshop on public database verification for journalists and social scientists held in Santa Fe, New Mexico USA in April 2006. Ten journalists and 10 statisticians, social scientists, public administrators and computer scientists met to discuss mutual concerns and worked to find solutions. This book contains most of the papers presented and the workproduct of three breakout groups, each investigating a different aspect of the problem.

Corporate Finance, Fourth Canadian Edition Feb 06 2021 Using the unifying valuation framework based on the Law of One Price, *Corporate Finance, Fourth Canadian Edition*, blends coverage of time-tested principles and the latest advancements with the practical perspective of the financial manager. With this ideal melding of the core with modern topics, innovation with proven pedagogy, renowned researchers Berk, DeMarzo and Stangeland establish the new canon in finance. KEY TOPICS: The Corporation;Introduction to Financial Statement Analysis;Arbitrage and Financial Decision Making;The Time Value of Money;Interest Rates;Valuing Bonds;Valuing Stocks;Investment Decision

Rules; Fundamentals of Capital Budgeting; Capital Markets and the Pricing of Risk; Optimal Portfolio Choice and the Capital Asset Pricing Model; Estimating the Cost of Capital; Investor Behaviour and Capital Market Efficiency; Financial Options; Option Valuation; Real Options; Capital Structure in a Perfect Market; Debt and Taxes; Financial Distress, Managerial Incentives, and Information; Payout Policy; Capital Budgeting and Valuation with Leverage; Valuation and Financial Modeling: A Case Study; The Mechanics of Raising Equity Capital; Debt Financing; Leasing; Working Capital Management; Short-Term Financial Planning; Mergers and Acquisitions; Corporate Governance; Risk Management; International Corporate Finance MARKET: Appropriate for Undergraduate Corporate Finance Courses.

Handbook of Research on Developing Smart Cities Based on Digital Twins Nov 17 2021 The advent of connected, smart technologies for the built environment may promise a significant value that has to be reached to develop digital city models. At the international level, the role of digital twin is strictly related to massive amounts of data that need to be processed, which proposes several challenges in terms of digital technologies capability, computing, interoperability, simulation, calibration, and representation. In these terms, the development of 3D parametric models as digital twins to evaluate energy assessment of private and public buildings is considered one of the main challenges of the last years. The ability to gather, manage, and communicate contents related to energy saving in buildings for the development of smart cities must be considered a specificity in the age of connection to increase citizen awareness of these fields. The Handbook of Research on Developing Smart Cities Based on Digital Twins contains in-depth research focused on the description of methods, processes, and tools that can be adopted to achieve smart city goals. The book presents a valid medium for disseminating innovative data management methods related to smart city topics. While highlighting topics such as data visualization, a web-based ICT platform, and data-sharing methods, this book is ideally intended for researchers in the building industry, energy, and computer science fields; public administrators; building managers; and energy professionals along with practitioners, stakeholders, researchers, academicians, and students interested in the implementation of smart technologies for the built environment.

Leadership That Gets Results (Harvard Business Review Classics) Jul 02 2020 A leader's singular job is to get results. But even with all the leadership training programs and "expert" advice available, effective leadership still eludes many people and organizations. One reason, says Daniel Goleman, is that such experts offer advice based on inference, experience, and instinct, not on quantitative data. Now, drawing on research of more than 3,000 executives, Goleman explores which precise leadership behaviors yield positive results. He outlines six distinct leadership styles, each one springing from different components of emotional intelligence. Each style has a distinct effect on the working atmosphere of a company, division, or team, and, in turn, on its financial performance. Coercive leaders demand immediate compliance.

Authoritative leaders mobilize people toward a vision. Affiliative leaders create emotional bonds and harmony. Democratic leaders build consensus through participation. Pacesetter leaders expect excellence and self-direction. And coaching leaders develop people for the future. The research indicates that leaders who get the best results don't rely on just one leadership style; they use most of the styles in any given week. Goleman details the types of business situations each style is best suited for, and he explains how leaders who lack one or more of these styles can expand their repertoires. He maintains that with practice leaders can switch among leadership styles to produce powerful results, thus turning the art of leadership into a science. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world—and will have a direct impact on you today and for years to come.

Corporate Finance Oct 17 2021 Teaching Students to Think Finance With a consistency in presentation and an innovative set of learning aids, Corporate Finance, Third Canadian Edition, simultaneously meets the needs of both future financial managers and non-financial managers. This textbook truly shows every student how to "think finance." Note: If you are purchasing an electronic version, MyFinanceLab does not

come automatically packaged with it. To purchase MyFinanceLab, please visit www.MyFinanceLab.com or you can purchase a package of the physical text and MyFinanceLab by searching for ISBN 10: 0133552683 / ISBN 13: 9780133552683.

Yearbook of Fishery Statistics 1999 Nov 05 2020 This volume of the "FAO Yearbook of Fisheries Statistics--Capture production" presents the annual statistics, for a varying series of recent years ending in 1999, on a world-wide basis, of fish, crustacean, molluscs and other aquatic animals, residues and plants, taken for all purposes (commercial, industrial, recreational and subsistence) by all types and classes of fishing units operating both in inland, fresh and brackish water areas and in inshore, offshore and highseas fishing areas.

Corporate Finance: The Core, Global Edition Mar 29 2020 Berk and DeMarzo's Corporate Finance uses a unifying valuation framework, the Law Of One Price, to present the core content instructors expect, the new ideas they want, and the pedagogy their students need to succeed. Corporate Finance: The Core fits programs and individual instructors who desire a streamlined book that is specifically tailored to the topics covered in the first one-semester course. For instructors who would like to use a text in a two semester, or more, sequence, please see Corporate Finance, the 31 chapter book also by Jonathan Berk and Peter DeMarzo.

Corporate Finance Dec 31 2022 Reach every student by pairing this text with MyLab Finance MyLab (TM) is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools and a flexible platform, MyLab personalizes the learning experience and improves results for each student.

To Err Is Human Oct 29 2022 Experts estimate that as many as 98,000 people die in any given year from medical errors that occur in hospitals. That's more than die from motor vehicle accidents, breast cancer, or AIDS—three causes that receive far more public attention. Indeed, more people die annually from medication errors than from workplace injuries. Add the financial cost to the human tragedy, and medical error easily rises to the top ranks of urgent, widespread public problems. To Err Is Human breaks the silence that has surrounded medical errors and their consequence—but not by pointing fingers at caring health care professionals who make honest mistakes. After all, to err is human. Instead, this book sets forth a national agenda—with state and local implications—for reducing medical errors and improving patient safety through the design of a safer health system. This volume reveals the often startling statistics of medical error and the disparity between the incidence of error and public perception of it, given many patients' expectations that the medical profession always performs perfectly. A careful examination is made of how the surrounding forces of legislation, regulation, and market activity influence the quality of care provided by health care organizations and then looks at their handling of medical mistakes. Using a detailed case study, the book reviews the current understanding of why these mistakes happen. A key theme is that legitimate liability concerns discourage reporting of errors—which begs the question, "How can we learn from our mistakes?" Balancing regulatory versus market-based initiatives and public versus private efforts, the Institute of Medicine presents wide-ranging recommendations for improving patient safety, in the areas of leadership, improved data collection and analysis, and development of effective systems at the level of direct patient care. To Err Is Human asserts that the problem is not bad people in health care—it is that good people are working in bad systems that need to be made safer. Comprehensive and straightforward, this book offers a clear prescription for raising the level of patient safety in American health care. It also explains how patients themselves can influence the quality of care that they receive once they check into the hospital. This book will be vitally important to federal, state, and local health policy makers and regulators, health professional licensing officials, hospital administrators, medical educators and students, health caregivers, health journalists, patient advocates—as well as patients themselves. First in a series of publications from the Quality of Health Care in America, a project initiated by the Institute of Medicine

Corporate Finance Nov 29 2022 For MBA/graduate students taking a course in corporate finance. Using the unifying valuation framework based on the Law of One Price, top researchers Jonathan Berk and Peter DeMarzo set the new standard for corporate finance textbooks. Corporate Finance blends coverage of time-tested principles and the latest advancements with the practical perspective of the financial manager. With

this ideal melding of the core with modern topics, innovation with proven pedagogy, Berk and DeMarzo establish the new canon in finance. The second edition reflects the constantly changing world of finance, including information on the recent financial crisis, new behavioral finance research, and updated practitioner interviews.

Information and Communication Technology for Competitive Strategies (ICTCS 2020) Aug 27 2022 This book contains the best selected research papers presented at ICTCS 2020: Fifth International Conference on Information and Communication Technology for Competitive Strategies. The conference was held at Jaipur, Rajasthan, India, during 11-12 December 2020. The book covers state-of-the-art as well as emerging topics pertaining to ICT and effective strategies for its implementation for engineering and managerial applications. This book contains papers mainly focused on ICT for computation, algorithms and data analytics, and IT security.

Data, Models, and Decisions Oct 24 2019 Combines topics from two traditionally distinct quantitative subjects, probability/statistics and management science/optimization, in a unified treatment of quantitative methods and models for management. Stresses those fundamental concepts that are most important for the practical analysis of management decisions: modeling and evaluating uncertainty explicitly, understanding the dynamic nature of decision-making, using historical data and limited information effectively, simulating complex systems, and allocating scarce resources optimally.

Leadership on the Line Jul 14 2021 Every day, in every facet of our lives, opportunities to lead call out to us. At work and at home, in our local communities and in the global village, the chance to make a difference beckons. Yet often, we hesitate. For all its passion and promise, for all its excitement and rewards, leading is risky, dangerous work. Why? Because real leadership—the kind that surfaces conflict, challenges long-held beliefs, and demands new ways of doing things—causes pain. And when people feel threatened, they take aim at the person pushing for change. As a result, leaders often get hurt both personally and professionally. In *Leadership on the Line*, renowned leadership authorities Ronald A. Heifetz and Marty Linsky marshal a half century of combined teaching and consulting experience to show that it is possible to put ourselves on the line, respond effectively to the risks, and live to celebrate our efforts. With compelling examples including the presidents of countries and the presidents of organizations, everyday managers and prominent activists, politicians and parents, the authors illustrate proven strategies for surviving and thriving amidst the dangers of leading: "Getting on the balcony": stepping back to get perspective while remaining fiercely engaged "Thinking politically": keeping the opposition close, but watching your allies, too "Orchestrating the conflict": using stress productively to work the issues "Giving the work back": putting the responsibility on those who need to make the change "Holding steady": maintaining your focus while taking the heat The authors also address often-neglected aspects of leadership, such as how to manage your personal vulnerabilities, and how to anchor yourself and sustain your spirit through tough times. Both uplifting and practical, this essential book enables each of us to lead courageously and confidently—without losing ourselves. AUTHOR BIO: Ronald A. Heifetz and Marty Linsky are on the faculty at the John F. Kennedy School of Government at Harvard University. Heifetz is the author of *Leadership Without Easy Answers* and Co-director of the school's Center for Public Leadership. Linsky is Faculty Chair of many of the school's executive programs, including Senior Officials in State and Local Government and *Leadership for the 21st Century*.

Estadísticas de Pesca Sep 23 2019 The FAO Yearbook of Fishery Statistics - Capture production is a compilation of statistics on nominal catches of fish, crustaceans, molluscs and other aquatic animals, residues and plants. The nominal catch statistics include only the production from capture fisheries with the exclusion of aquaculture production. Former volumes of the Yearbook contain catches and aquaculture statistics combined. The statistics are presented by country or territory, species, major fishing area and year, and for various aggregations. In order to provide complete coverage of catch statistics throughout the world, where officially-reported national statistics are lacking or are considered unreliable, FAO makes estimates based on the best information available.

The Fourth Industrial Revolution Apr 30 2020 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this

revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Entertainment Science May 24 2022 The entertainment industry has long been dominated by legendary screenwriter William Goldman's "Nobody-Knows-Anything" mantra, which argues that success is the result of managerial intuition and instinct. This book builds the case that combining such intuition with data analytics and rigorous scholarly knowledge provides a source of sustainable competitive advantage - the same recipe for success that is behind the rise of firms such as Netflix and Spotify, but has also fueled Disney's recent success. Unlocking a large repertoire of scientific studies by business scholars and entertainment economists, the authors identify essential factors, mechanisms, and methods that help a new entertainment product succeed. The book thus offers a timely alternative to "Nobody-Knows" decision-making in the digital era: while coupling a good idea with smart data analytics and entertainment theory cannot guarantee a hit, it systematically and substantially increases the probability of success in the entertainment industry. *Entertainment Science* is poised to inspire fresh new thinking among managers, students of entertainment, and scholars alike. Thorsten Hennig-Thurau and Mark B. Houston - two of our finest scholars in the area of entertainment marketing - have produced a definitive research-based compendium that cuts across various branches of the arts to explain the phenomena that provide consumption experiences to capture the hearts and minds of audiences. Morris B. Holbrook, W. T. Dillard Professor Emeritus of Marketing, Columbia University *Entertainment Science* is a must-read for everyone working in the entertainment industry today, where the impact of digital and the use of big data can't be ignored anymore. Hennig-Thurau and Houston are the scientific frontrunners of knowledge that the industry urgently needs. Michael Kölmel, media entrepreneur and Honorary Professor of Media Economics at University of Leipzig *Entertainment Science's* winning combination of creativity, theory, and data analytics offers managers in the creative industries and beyond a novel, compelling, and comprehensive approach to support their decision-making. This ground-breaking book marks the dawn of a new Golden Age of fruitful conversation between entertainment scholars, managers, and artists. Allègre Hadida, Associate Professor in Strategy, University of Cambridge

Campbell-Walsh Urology Sep 03 2020 Since 1954, Campbell-Walsh Urology has been internationally recognized as the pre-eminent text in its field. Edited by Alan J. Wein, MD, PhD(hon), Louis R. Kavoussi, MD, Alan W. Partin, MD, PhD, Craig A. Peters, MD, FACS, FAAP, and the late Andrew C. Novick, MD, it provides you with everything you need to know at every stage of your career, covering the entire breadth and depth of urology - from anatomy and physiology through the latest diagnostic approaches and medical and surgical treatments. Be certain with expert, dependable, accurate answers for every stage of your career from the most comprehensive, definitive text in the field! Required reading for all urology residents, Campbell-Walsh Urology is the predominant reference used by The American Board of Urology for its board examination questions. Visually grasp and better understand critical information with the aid of algorithms, photographs, radiographs, and line drawings to illustrate essential concepts, nuances of clinical presentation and technique, and decision making. Stay on the cutting edge with online updates. Get trusted

perspectives and insights from hundreds of well-respected global contributors, all of whom are at the top and the cutting edge of their respective fields. Stay current with the latest knowledge and practices. Brand-new chapters and comprehensive updates throughout include new information on perioperative care in adults and children, premature ejaculation, retroperitoneal tumors, nocturia, and more! Meticulously revised chapters cover the most recent advancements in robotic and laparoscopic bladder surgery, open surgery of the kidney, management of metastatic and invasive bladder cancer, and many other hot topics! Reference information quickly thanks to a new, streamlined print format and easily searchable online access to supplemental figures, tables, additional references, and expanded discussions as well as procedural videos and more at www.expertconsult.com. The new edition of Campbell-Walsh Urology is the must have reference for practitioners and residents!

Mathematical modelling of the pandemic of 2019 novel coronavirus (COVID-19): Patterns, Dynamics, Prediction, and Control Jul 26 2022

International Corporate Finance Feb 18 2022 This international finance textbook integrates cases and text to deliver a hands-on, problem-solving approach based on sound financial theory. Features: * Emphasizes how to be an international financial manager, with a special discussion at the end of every chapter - Implications for Managers. This discussion explains how the chapter concepts affect financial decisions. * More than just a case book, the text chapters are fully developed. The extensive problems and end-of-chapter material can be used separately from the cases providing flexibility for undergraduate and graduate curriculums. * Cases, problem sets, and examples are integrated with each chapter, immersing students in real business situations. * Each case supplies the institutional background and data necessary to analyze a variety of alternatives and to determine the tradeoffs represented by choosing among them. Cases are from the most well-respected sources - Darden, Harvard, and the International Institute for Management Development. * The text emphasizes risk management, especially in Chapters 4 through 7, providing both the theory and detailed examples in an area important for today's manager. * As an example of

FAO Yearbook Mar 10 2021 This publication contains a compilation of statistics on nominal catches of fish, crustaceans, molluscs and other aquatic animals, residues and plants from capture fisheries worldwide, with the exclusion of aquaculture production. The statistics are presented by country or territory, species, major fishing area and various aggregations, for a varying series of recent years ending in 2002. The data are based on officially reported national statistics, or where these are lacking or are considered unreliable, from FAO estimates based on the best information available. A separate volume is also available with fishery statistics relating to aquaculture production (ISBN 9250051530).

Yearbook of Fishery Statistics 1997 Aug 03 2020 This volume presents statistical data on capture production & foreign trade of fishery commodities for all countries & territories worldwide. Recommended in: Walford's Guide to Reference Material.

Journal of the National Cancer Institute Dec 07 2020

Fundamentals of Corporate Finance Sep 27 2022 Core concepts. Contemporary ideas. Outstanding, innovative resources. To succeed in your business studies, you will need to master core finance concepts and learn to identify and solve many business problems. Learning to apply financial metrics and value creation as inputs to decision making is a critical skill in any kind of organisation. Fundamentals of Corporate Finance shows you how to do just that. Berk presents the fundamentals of business finance using the Valuation Principle as a clear, unifying framework. Throughout the text, its many applications use familiar Australian examples and makes consistent use of real-world data. This Australian adaptation of the highly successful US text Fundamentals of Corporate Finance features a high-calibre author team of respected academics. The second edition builds on the strengths of the first edition, and incorporates updated figures, tables and facts to reflect key developments in the field of finance. For corporate finance or financial management students, at undergraduate or post-graduate level.

FAO Yearbook [of] Fishery Statistics Nov 25 2019 The FAO Yearbook of Fishery Statistics - Capture production is a compilation of statistics on nominal catches of fish, crustaceans, molluscs and other aquatic animals, residues and plants. The statistics are presented by country or territory, species, major fishing area and year, and for various aggregations. In order to provide complete coverage of catch statistics

throughout the world, where officially reported national statistics are lacking or are considered unreliable, FAO makes estimates based on the best information available.

Insights in Public Health Education and Promotion: 2021 Jan 20 2022

Digital Work and Personal Data Protection Mar 22 2022 This book gathers contributions related to the most pressing problems and challenges that new information and communications technologies (ICT) and digital platforms introduce into the labour market, and the impact they have on the way that people work, their rights and even their health and dignity. In addition, there are also chapters studying personal data protection, which is currently a topic of maximum interest due to the New European Regulation about it. The contributors here are drawn from around the world, with several countries represented, such as Portugal, Spain, Italy, Brazil, Australia and Venezuela. The book will appeal lawyers, legal and human resources experts, economists, judges, academics and staff from trade unions, and employers' representation. The volume features insights and contributions in different languages, with chapters in Spanish (12), English (6) and Portuguese (4).

Secondary Analysis of Electronic Health Records Jun 24 2022 This book trains the next generation of scientists representing different disciplines to leverage the data generated during routine patient care. It formulates a more complete lexicon of evidence-based recommendations and support shared, ethical decision making by doctors with their patients. Diagnostic and therapeutic technologies continue to evolve rapidly, and both individual practitioners and clinical teams face increasingly complex ethical decisions. Unfortunately, the current state of medical knowledge does not provide the guidance to make the majority of clinical decisions on the basis of evidence. The present research infrastructure is inefficient and frequently produces unreliable results that cannot be replicated. Even randomized controlled trials (RCTs), the traditional gold standards of the research reliability hierarchy, are not without limitations. They can be costly, labor intensive, and slow, and can return results that are seldom generalizable to every patient population. Furthermore, many pertinent but unresolved clinical and medical systems issues do not seem to have attracted the interest of the research enterprise, which has come to focus instead on cellular and molecular investigations and single-agent (e.g., a drug or device) effects. For clinicians, the end result is a bit of a "data desert" when it comes to making decisions. The new research infrastructure proposed in this book will help the medical profession to make ethically sound and well informed decisions for their patients.

FAO Yearbook Apr 10 2021 This volume of the 'Yearbook of Fishery Statistics: Capture production' presents the annual statistics, for a varying series of recent years ending in 2005, on a worldwide basis, on nominal catches of fish, crustaceans, molluscs and other aquatic animals, residues and plants, taken for all purposes (commercial, industrial, recreational and subsistence) by all types and classes of fishing unites (fishermen, vessels, gear etc.) operating both in inland, fresh and brackish water areas, and in inshore, offshore and high seas fishing areas, with the exclusion of aquaculture production. The statistics are presented by country or territory, species, major fishing area and year, and for various aggregations. - Dans ce volume de l' "Annuaire statistiques des peches: Captures" figurent, pour diverses periodes recentes prenant fin en 2005 les statistiques etablies sur une base mondiale des captures nominales de tous poissons, crustaces, mollusques et autres animaux aquatiques, residus et plantes aquatiques, effectuees a toutes fins (commerciales, industrielle, recreatives ou de subsistance) par tous les types et categories d'unite de peche (pecheurs, bateaux, engins, etc.) operant tant dans les eaux continentales, douces et saumates que dans les zones de peche du littoral, du large et de la haute mer, a l'exclusion de la production aquacole. Les statistiques sont presentees par pays ou territoires, espece, principale zone de peche et annee, et pour divers niveaux d' agregats. - En el presente volumen del "Anuario estadisticas de pesca: Capturas" se presentan las estadisticas mundiales, para diversas series de los ultimos anos que terminan en 2005, de las capturas nominales de peces, crustaceos, moluscos y demas animales acuaticos, residuos y plantas, hechas con cualquier fin (comercial, industrial, recreativo y de subsistencia), por unidades de pesca de todos los tipos (pescadores, barcos, artes, etc.) en aguas continentales, dulces y salobres y en areas de pesca de bajura, media altura o altura, con exclusion de la produccion de acuicultura. Las estadisticas se presentan desglosadas por paises o territorios, especies, principales zonas de pesca y por diversos conceptos."

Big Data and Global Trade Law Apr 22 2022 This collection explores the relevance of global trade law for data, big data and cross-border data flows. Contributing authors from different disciplines including

law, economics and political science analyze developments at the World Trade Organization and in preferential trade venues by asking what future-oriented models for data governance are available and viable in the area of trade law and policy. The collection paints the broad picture of the interaction between digital technologies and trade regulation as well as provides in-depth analyses of critical to the data-driven economy issues, such as privacy and AI, and different countries' perspectives. This title is also available as Open Access on Cambridge Core.

Retrofitting for Optimal Energy Performance Feb 27 2020 Retrofitting expresses, in a traditional approach, the process of improving something after it has been manufactured, constructed, or assembled. These systems integrate new technologies, new functions, and new services that increase the energy performance in existing private, public, and commercial buildings. Retrofitting for Optimal Energy Performance is a comprehensive reference source that examines environmentally conscious technologies and their applications in advancing retrofitting practices. Providing relevant theoretical frameworks and the latest empirical research findings in the area, it highlights an array of topics such as climate change, energy management, and optimization modeling, and is essential for academicians, students, researchers, engineers, architects, entrepreneurs, managers, policymakers, and building owners.

CDC Yellow Book 2018: Health Information for International Travel Dec 19 2021 THE ESSENTIAL

WORK IN TRAVEL MEDICINE -- NOW COMPLETELY UPDATED FOR 2018 As unprecedented numbers of travelers cross international borders each day, the need for up-to-date, practical information about the health challenges posed by travel has never been greater. For both international travelers and the health professionals who care for them, the CDC Yellow Book 2018: Health Information for International Travel is the definitive guide to staying safe and healthy anywhere in the world. The fully revised and updated 2018 edition codifies the U.S. government's most current health guidelines and information for international travelers, including pretravel vaccine recommendations, destination-specific health advice, and easy-to-reference maps, tables, and charts. The 2018 Yellow Book also addresses the needs of specific types of travelers, with dedicated sections on: · Precautions for pregnant travelers, immunocompromised travelers, and travelers with disabilities · Special considerations for newly arrived adoptees, immigrants, and refugees · Practical tips for last-minute or resource-limited travelers · Advice for air crews, humanitarian workers, missionaries, and others who provide care and support overseas Authored by a team of the world's most esteemed travel medicine experts, the Yellow Book is an essential resource for travelers -- and the clinicians overseeing their care -- at home and abroad.
