This fully updated third edition of The Handbook of International Humanitarian Law sets out an international manual of humanitarian law accompanied by case analysis and extensive explanatory commentary by a team of distinguished and internationally renowned experts. The new edition takes account of recent developments in the law, including the 2010 amendments to the ICC Statute, the progressive evolution of customary law, and new jurisprudence from national and international courts and tribunals. It sheds light on controversial topics like direct participation in hostilities; air and missile warfare; belligerent occupation; operational detention; and the protection of the environment in armed conflict. The book also addresses the growing need to consider the interface between international humanitarian law and human rights, as well as other branches of international law, both during armed conflicts and in post-conflict situations. The commentary both deepens reflection on such innovations, and critically reconsiders views expressed in earlier editions to provide a contemporary analysis of this changing field. Renowned international lawyers offer a broad spectrum of legal opinions, restating the law in this area, which is applicable worldwide. Particular attention is paid to problems of application of the law in recent military campaigns, which are assessed and interpreted in a practice-oriented manner. Based on best-practice rules of global importance, this book gives invaluable guidance to practitioners and scholars of this important body of law.
