A six-degrees-of-freedom trajectory program for quasi-symmetric rigid bodies is described. The equations of motion are developed such that either a body-fixed or fixed-plane moving coordinate system can be utilized. Provision is made for large angle and angular rate motions, such as are experienced by magnus rotor munitions. The aerodynamic system permits the usual aeroballistic coefficients to be expressed as tabular functions of angle of attack and Mach number; in addition, the magnus force, magnus moment, and rolling moment coefficients can be tabular functions of the nondimensional spin parameter, $pd/2V$. Additional aerodynamic terms are provided to account for body-fixed aerodynamic asymmetries and/or control inputs, aerodynamic roll angle effects, flow asymmetry with respect to the angle of attack plane at zero spin, and lateral c. g. offset. The computer program is written in General Fortran IV language compatible with CDC 6400, IBM 360, and GE 635 data processing machines. Included in the report are the program input and output formats, flow charts of the main program subroutines, and a complete program listing. As every photographer quickly learns, there's more to studio lighting than simply learning the equipment. The 1995 National Household Education Survey (NHES:95) was a random digit dial telephone survey of households developed by the National Center for Education Statistics. The NHES:95 included two topical survey components: the Adult Education component, which collected information about adults' participation in adult education, and the Early Childhood Program Participation (ECPP) component, which collected information about children's participation in nonparental child care and early childhood programs. This manual provides documentation and guidance for users of the public release data file for the ECPP component. Information about the purpose of the study, the data collection instruments, the sample design, and data collection and data processing procedures is provided. Some information about factors that should be kept in mind when using ECPP data is also provided. For the ECPP component, interviews were conducted with parents of 14,064 children, a figure that included 101 home schooled children. Four appendixes present screening and study questionnaires, information about the file layout, the Statistical Analysis System code for derived variables, and the ECPP codebook. (Contains 8 tables, 2 figures, and 23 references.) (SLD) Ready to move to the Mac?
