Julian Cope, eccentric and visionary rock musician, follows the runaway underground success of his book *Krautrock* sampler with *Japrock* sampler, a cult deconstruction of Japanese rock music, and reveals what really happened when East met West after World War Two. It explores the clash between traditional, conservative Japanese values and the wild rock 'n' roll renegades of the 1960s and 70s, and tells of the seminal artists in Japanese post-war culture, from itinerant art-house poets to violent refusenik rock groups with a penchant for plane hijacking.

THE PREHISTORIC PEAK is a practical guide to discovering and exploring the Neolithic and Bronze Age monuments of the Peak District, not with the intention of explaining their origins, but to encourage everyone to go and see them for themselves as they are today. After all, they are located in some of the most spectacular landscapes available to us in Britain today and make fascinating destinations for journeys that are about experiencing all the wonders of the world around us. Each site has been personally visited by the author and is described through photographs, ground plans of what can be seen today, custom maps with step-by-step, clear, concise directions on how to find each one and all the necessary GPS and OS grid references. It also includes practical advice on how to make your exploration of the Prehistoric Peak as pleasurable and safe as possible.

CW: Suicidal ideation, self-harm, sex/death psychodynamics, but the journey moves from such darkness into radiant, transformative light! “and the glints on waves / are not glints on waves, but... / stars...” In summer 2010, artist and poet Bruce Rimell fell into a self-destructive spiral of suicidal ideation, confused hyperactivity, and dark dreams so

unsettling and so persistent that they threatened to tear his life apart. The most prominent recurring nightmare was one in which he hanged himself and enjoyed it, eager to end his life, but at the last moment he would spit out letters, so did not die. Waking up terrified, he felt himself coming undone, desperately seeking answers but finding none. When he began to 'enter into the image' of this dream, rather than study it rationally, a new and unexpected transformative path opened up towards a more holistic Queer spiritual identity. This in turn kickstarted the healing of his latent self-destructive urges that arose from his internalised rage at centuries of homo/queerphobic persecution. 'Hangman Starman' is a visionary voyage through the darkest realms of Bruce's gay/queer psyche, a brutally honest account of his time in the underworld, and how he worked his dreams to burn his darkness through to the blazing light on the other side.

Stanley J. Grenz describes four major views on the millennium held by evangelicals and assesses their strengths and weaknesses. Christopher Partridge's *The Lyre of Orpheus* is the first general introduction to the subject of religion and popular music. His aim in this book is to introduce a range of theoretical and methodological perspectives to be used in the study of religion and popular music and popular music subcultures. Looks at megalithic sites and monuments in Great Britain

In the *Odyssey of Grace* series, Cy Mersereau invites you to join him as he travels through the twenty-seven books of the New Testament. In this series, each book of the New Testament is summarized, with special consideration given to topics of common, and sometimes controversial, interest. The journey begins with the coming of Christ in the four Gospels, then threads its way through the epistles and ends with Revelation, where time dissolves into the eternal state. Along the way, the reader will encounter adventure, history, theology, advice for practical Christian living, and become acquainted with some of the more fascinating

personalities of the early church. The author of each book has his own style, his own emphasis, and his own story that is part of the larger story of Jesus Christ and the redemption he purchased for us on Calvary two thousand years ago. Some of the topics covered here include: Prophetic insights from believers of various backgrounds on the book of Revelation. The hotly contested miracle of Jesus turning water into wine. Judas, his betrayal of Christ, and how and when he died. A discussion of the book of Philemon to address the question of whether the Bible promotes slavery. A comprehensive look into why the Gospel of Mark has so many endings and which is the right one. Join in on the conversation as Cy discusses these questions, and so many more!

Every good traveler plans his or her itinerary carefully to use time well and benefit as much as possible from the trip. I did not have an agenda, however. I wanted to travel Middle Eastern style, that is, with no prior planning. It would have been a nuisance to stick to a set timetable in a country that was, except for the language, entirely alien to me. I had decided to spend five weeks in Iran and had certain ideas as to what and whom I wanted to see, but my choices had to be la carte one bite at a time. I wanted to feel the pulse of the country by meeting and talking to as many people as possible. I knew that as a man traveling alone in a Moslem country I faced certain limitations. My quest had to be limited to interacting with men, with little exposure to women and their concerns.

Researchers of Paganism from a variety of disciplines examine how they have been affected by their contact with this nontraditional religion, how this religion has been affected by academic researchers and what this reveals about participative research methods. Through experiments to try and places to visit, as well as a historical exploration of magic and interviews with leading magicians, *The Book of English Magic* will introduce you to the extraordinary world that lies beneath the surface. Magic runs

through the veins of English history, part of daily life from the earliest Arthurian legends to Aleister Crowley to the novels of Tolkien and Philip Pullman, and from the Druids to Freemasonry and beyond. Richly illustrated and deeply knowledgeable, this book is an invaluable source for anyone curious about magic and wizardry, or for sophisticated practitioners wanting to learn more. Paganism is rapidly becoming a religious, creative, and political force internationally. It has found one of its most public expressions in popular music, where it is voiced by singers and musicians across rock, folk, techno, goth, metal, Celtic, world, and pop music. With essays ranging across the US, UK, continental Europe, Australia and Asia, 'Pop Pagans' assesses the histories, genres, performances, and communities of pagan popular music. Over time, paganism became associated with the counter culture, satanic and gothic culture, rave and festival culture, ecological consciousness and spirituality, and new ageism. Paganism has used music to express a powerful and even transgressive force in everyday life. 'Pop Pagans' examines the many artists and movements which have contributed to this growing phenomenon. This book sets out to explore the connections between megalithic monuments and Rock 'n' Roll music by first addressing what the megalithic structures would have originally meant to the builders and users of these sites and at the statements they were making at that time. It then looks at how Rock 'n' Roll artists have incorporated images of these monuments into album cover designs by looking at specific examples, in an attempt to understand why, despite being separated by millennia from the original builders, they chose to use such places to represent the statements they are making through their music in the late 20th and early 21st centuries. Robert J. Wallis explores the interface between the 'new' and prehistoric shamans of popular culture and anthropology, drawing on interviews with a variety of practitioners,

particularly contemporary pagans in Britain and north America. Blake said of his works, 'Tho' I call them Mine I know they are not Mine'. So who owns Blake? Blake has always been more than words on a page. This volume takes Blake 2.0 as an interactive concept, examining digital dissemination of his works and reinvention by artists, writers, musicians, and filmmakers across a variety of twentieth-century media. West Midlands 1980s, home to heavy metal. Black Sabbath and Judas Priest are household names, but over the smoking chimneys and factory yards something new and equally ugly forms a 'Grebo' was a media constructed music genre that even today sends a shudder down the spines of discerning music fans and critics. A homegrown proto-grunge a counterpart to the likes of Butthole Surfers, Mudhoney, early Nirvana, Alice In Chains, and Soundgarden in the US a grebo was a British phenomenon that drew on an eclectic range of influences, from punk, 60s garage and psychedelia, through to 70s heavy rock and thrash metal. It foreshadowed rave culture and was steeped in class politics. GAYE BYKERS ON ACID and CRAZYHEAD hailed from Leicester. They were not the first bands to be labelled grebo but they were the most unashamedly unkempt and came to be considered its greatest exponents. They were a burst of dirty thunder and almost no one liked them. Based on interviews with band members, friends, fans, and roadies, this book is an uncompromising history of an overlooked music scene. Rich Deakin charts its course via the changing fortunes of the Bykers and Crazyhead, taking us on the booze-filled tour buses, behind the dodgy deals and onto the international stage and back again (with a pitstop for a rock movie that swallows lots of money). Their careers were short, but the two bands managed to shake up the UK indie scene and along the way became Britain's unlikely ambassadors of rock following the collapse of Soviet Russia. Strap yourself in for a rocket ride of a book. This is GREBO! a the

complete loud and lousy story! More than 50 scholars combine their expertise to present a historical and topical dictionary of premillennial theology. Challenging some assessments of religion in the West, this study argues that, although much organized religion, particularly Christianity, is in numerical decline, in actual fact we are witnessing an alternative spiritual re-enchantment of society and culture. Applying a range of critical approaches to works by authors including Susan Cooper, Catherine Fisher, Geraldine McCaughrean, Anthony Horowitz and Philip Pullman, this book looks at the formative and interrogative relationship between recent children's literature and fashionable but controversial aspects of modern Paganism. The study of hunter-gatherers has had a profound impact on thinking about human nature and about the nature of society. The subject has especially influenced ideas on social evolution and on the development of human culture. Anthropologists and archaeologists continue to investigate living hunter-gatherers and the remains of past hunter-gatherer societies in the hope of unearthing the secrets of our ancestors and learning something of the natural existence of humankind. *Hunter-Gatherers in History, Archaeology and Anthropology* provides a definitive overview of hunter-gatherer historiography, from the earliest anthropological writings through to the present day. What can early visions of the hunter-gatherer tell us about the societies that generated them? How do diverse national traditions, such as American, Russian and Japanese, manifest themselves in hunter-gatherer research? What is the most up-to-date thinking on the subject and how does it reflect current trends within the social sciences? This book provides a much-needed overview of the history of thought on one of science's most intriguing subjects. It will serve as a landmark text for anthropologists, archaeologists and students researching anthropological theory or the history of social anthropology and

related disciplines. The Routledge Handbook of Religious and Spiritual Tourism provides a robust and comprehensive state-of-the-art review of the literature in this growing sub-field of tourism. This handbook is split into five distinct sections. The first section covers past and present debates regarding definitions, theories, and concepts related to religious and spiritual tourism. Subsequent sections focus on the supply and demand aspects of religious and spiritual tourism markets, and examine issues related to the management side of these markets around the world. Areas under examination include religious theme parks, the UNESCO branding of religious heritage, gender and performance, popular culture, pilgrimage, environmental impacts, and fear and terrorism, among many others. The final section explores emerging and future directions in religious and spiritual tourism, and proposes an agenda for further research. Interdisciplinary in coverage and international in scope through its authorship and content, this will be essential reading for all students, researchers, and academics interested in Tourism, Religion, Cultural Studies, and Heritage Studies. Music, Memory and Memoir provides a unique look at the contemporary cultural phenomenon of the music memoir and, leading from this, the way that music is used to construct memory. Via analyses of memoirs that consider punk and pop, indie and dance, this text examines the nature of memory for musicians and the function of music in creating personal and cultural narratives. This book includes innovative and multidisciplinary approaches from a range of contributors consisting of academics, critics and musicians, evaluating this phenomenon from multiple academic and creative practices, and examines the contemporary music memoir in its cultural and literary contexts. Over the last thirty years issues of culture, identity and meaning have moved out of the academic sphere to become central to politics and society at all levels from the local to the global. Archaeology has been at the

forefront of these moves towards a greater engagement with the non-academic world, often in an extremely practical and direct way, for example in the disputes about the repatriation of human burials. Such disputes have been central to the recognition that previously marginalized groups have rights in their own past that are important for their future. The essays in this book look back at some of the most important events where a role for an archaeology concerned with the past in the present first emerged and look forward to the practical and theoretical issues now central to a socially engaged discipline and shaping its future. This book is published in honor of Professor Peter Ucko, who has played an unparalleled role in promoting awareness of the core issues in this volume among archaeologists. (Book).

Turn On Your Mind: Four Decades of Great Psychedelic Rock is a history and critical examination of rock's most inventive genre. Whether or not psychedelic drugs played a role (and as many musicians say they've used them as not), psychedelic rock has consistently charted brave new worlds that exist only in the space between the headphones. The history books tell us the music's high point was the Haight-Ashbury scene of 1967, but the genre didn't start in San Francisco, and its evolution didn't end with the Summer of Love. A line can be drawn from the hypnotic drones of the Velvet Underground to the disorienting swirl of My Bloody Valentine; from the artful experiments of the Beatles' Revolver to the flowing, otherworldly samples of rappers P.M. Dawn; from the dementia of the 13th Floor Elevators to the grungy lunacy of the Flaming Lips; and from the sounds and sights at Ken Kesey's '60s Acid Tests to those at present-day raves. Turn On Your Mind is an attempt to connect the dots from the very first groups who turned on, tuned in, and dropped out, to such new-millennial practitioners as Wilco, the Elephant 6 bands, Moby, the Super Furry Animals, and the so-called "stoner-rock" and "ork-pop" scenes. Recumbent Stone

Circles are a distinctive architectural style of British stone circle. Built circa 2500 BC, they dominated the Late Neolithic landscape of Aberdeenshire, Scotland. This book discusses their archaeology and, using experimental archaeology, explains how the original builders went about building these magnificent stone circles. Sharing the results of the author's unique experiments, the book demonstrates how measured ropes were used to set out the geometrical design of the stone rings, as well as dictate the dimensions of the circle's respective orthostats. Moreover, given the book's provision of instructions on to repeat these experiments, the reader will be able to explore how these circles not only captured their corresponding astronomy, but how they were also positioned in the landscape so that they were astronomically aligned towards each other, creating a network of inter-aligned stone circles that enabled the prehistoric communities to synchronise both time and space across the vast regions of Aberdeenshire. This much-needed volume scrutinises in detail the relationship between archaeology, heritage and the public. Featuring case studies from around the world. From the author of the acclaimed *Insectopedia*, a powerful exploration of loss, endurance, and the absences that permeate the present. When Hugh Raffles's two sisters died suddenly within a few weeks of each other, he reached for rocks, stones, and other seemingly solid objects as anchors in a world unmoored, as ways to make sense of these events through stories far larger than his own. A moving, profound, and affirming meditation, *The Book of Unconformities* is grounded in stories of stones: Neolithic stone circles, Icelandic lava, mica from a Nazi concentration camp, petrified whale blubber in Svalbard, the marble prized by Manhattan's Lenape, and a huge Greenlandic meteorite that arrived with six Inuit adventurers in the exuberant but fractious New York City of 1897. As Raffles follows these fundamental

objects, unearthing the events they've engendered, he finds them losing their solidity and becoming as capricious, indifferent, and willful as time itself. This latest chronicle in the series is part travelogue, part health update and part commentary on a wide range of related or not so related topics and themes, loosely or closely linked to a recent trip taken by a Parkinson's sufferer and his family to Malaysia. Much more than just an account of living with Parkinson's, this witty and often quite touching chronicle explores both the man and the mind behind the condition. With a viewpoint ranging from, CBA (can't be arsed) to OCD (obsessive compulsive disorder) he journeys into a broader analysis of any topic whether related or unrelated. Searching questions may shed new light, or may just not get answered. It all depends on what happening at the time! From city skyscrapers to exotic beach hotels; from pirates to heroes of WW2 and from the stunning jungle landscapes and glossy shopping malls of Kuala Lumpur, living with Parkinson's has never been so exotic or so much fun! In this history of roads and what they have meant to the people who have driven them, one of Britain's favourite cultural historians reveals how a relatively simple road system turned into a maze-like pattern of roundabouts, flyovers, and spaghetti junctions. Using a unique blend of travel writing, anthropology, history and social observation, he explores how Britain's roads have their roots in unexpected places, from Napoleon's role in the numbering system to the surprising origin of sat-nav. Full of quirky nuggets of history, such as the day trips organised to see the construction of the M1 and the 2.5m Mills and Boons used to build the M6 Toll Road, On Roads also celebrates innovators whose work we take for granted, such as the designers of the road sign system. On subjects ranging from speed limits to driving on the left, and the 'non-places' where we stop to the unwritten laws of traffic jams, these hidden stories have never been told together, until now. This is an

essential tribute to the vitality and breadth of shamanic tradition both amongst the most distant tribes of America and Asia, and within seemingly ordinary aspects of modern western culture. *Stumbling Down the Shamanic Path* relates how a spiritual skeptic became a questioner, a meditator who avoided gurus, an explorer of earth energies, and then met the teacher who discerned the shaman sleeping in the spirit of a middle-aged alpinist. That was only the beginning, for pursuit of this new tack offered a new set of hurdles. After years of bumpy roads, Michle Burdet is today a practitioner of ancient shamanic arts such as soul retrieval and is teaching apprentices to carry on the torch of what she likes to call prehistoric psychotherapy. As a book about emergent spirituality in the contemporary West, this book focuses on the nature, evolution and significance of new forms of religion and alternative spiritualities. Part One of the book provides the theoretical background and guides the reader through some of the principal debates. After an overview of the secularization thesis, which argues that the West is becoming increasingly disenchanted, the second chapter turns to the sociological analysis of new religions and alternative spiritualities. Particular attention is given to the ideas of the sociologist of religion Ernst Troeltsch, especially his enigmatic analysis of the emergence of mystical religion, which presciently provides helpful insights into understanding the contemporary alternative religious milieu. Against sociologists such as Bryan Wilson and Steve Bruce, this and the subsequent chapter argues that, rather than being insignificant, new forms of spirituality are actually proving to be a significant part of Western re-enchantment. Chapter 3 constructs a general theory of the re-enchantment of the West. *Ideas of Landscape* discusses the current theory and practice of landscape archaeology and offers an alternative agenda for landscape archaeology that maps more closely onto the established empirical strengths of landscape study

and has more contemporary relevance. The first historical assessment of a critical period in archaeology Takes as its focus the so-called English landscape tradition -- the ideological underpinnings of which come from English Romanticism, via the influence of the "father of landscape history": W. G. Hoskins Argues that the strengths and weaknesses of landscape archaeology can be traced back to the underlying theoretical discontents of Romanticism Offers an alternative agenda for landscape archaeology that maps more closely onto the established empirical strengths of landscape study and has more contemporary relevance Introduces undergraduates to the key debates regarding space and culture and the key theoretical arguments which guide cultural geographical work. This book addresses the impact, significance, and characteristics of the 'cultural turn' in contemporary geography. It focuses on the development of the cultural geography subdiscipline and on what has made it a peculiar and unique realm of study. It demonstrates the importance of culture in the development of debates in other subdisciplines within geography and beyond. In line with these previous themes, the significance of space in the production of cultural values and expressions is also developed. Along with its timely examination of the health of the cultural geographical subdiscipline, this book is to be valued for its analysis of the impact of cultural theory on studies elsewhere in geography and of ideas of space and spatiality elsewhere in the social sciences. This book is a printed edition of the Special Issue "Deep Mapping" that was published in Humanities Prehistoric human life is a common reference point in contemporary culture, inspiring attempts to become happier, healthier, or better people. Exploited by capitalism, overwhelmed by technology, and living in the shadow of environmental catastrophe, we call on the prehistoric to escape the present, and to model alternative ways of living our lives. In

Back to the Stone Age Ben Pitcher explores how ideas about race are tightly woven into the powerful origin stories we use to explain who we are, where we came from, and what we are like. Using a broad range of examples from popular culture – from everyday practices like lighting fires and walking in the woods to engagements with genetic technologies and Neanderthal DNA, from megaliths and museum mannequins to television shows and best-selling nonfiction – Pitcher demonstrates how prehistory is alive in the twenty-first century, and argues that popular flights back in time provide revealing insights into present-day anxieties, obsessions, and concerns. Back to the Stone Age shows that the human past is not set in stone. By opening up the prehistoric to critical contestation, Pitcher places racial justice at the centre of questions about the existence and persistence of Homo sapiens in the contemporary world. Traces the 1960s effort to revive music in England that underscored the achievements of such period artists as Pink Floyd, Nick Drake and Led Zeppelin, providing insight into how their work reflected historical precedents while establishing models for present-day musicians. Original. 10,000 first printing. Of all the themes in the book of Revelation none has proved to be more controversial than the Millennial Kingdom of Christ.

Notwithstanding the very vast bibliography on the theme, there is not yet a critical history which systematically measures the adequacy of the interpretations of Rev. 20,1-10 made by different interpreters. The first part of this book sets out to fill this lacuna by making available in one place the standard exegetical responses, of the past and present, to the enigmas of Rev 20,1-10. The second part, in dialogue with scholarly opinions, offers a carefully thought out exegesis of the text containing original perspectives that help to overcome the noticeable weak points in the contributions of critical biblical scholarship on this subject. It also attempts to penetrate into the theological message hidden in the

suggestive words and images in the text. After that, it goes ahead to determine an interpretative paradigm that is profitable for the pastoral and spiritual application of the theological message. The exegete and the theologian will find in this study helpful data for their research. This work can also help anyone bewildered by the millenarian prophecies often associated with Rev 20,1-10 to discern the aberrations in the text's interpretation that are not the correct statements of its message and meaning. In 2009, environmental activists - from all walks of life - won a nine year battle to prevent quarrying on a sacred landscape, in the Peak District National Park, called Stanton Moor. The diversity of tactics employed - from building a labyrinth of tree houses and tunnels, to letter writing - created an impenetrable defense. Guarding Sacred Sites is the first book study to document the direct action based campaign on Stanton Moor. It weaves personal, first hand accounts of the author, who lived on Stanton Moor at the protest site, together with interviews and contributions from landowners, activists, locals and other users of the moor. The book creates an alternative social history for Stanton Moor. In recent years the intersections between art history and archaeology have become the focus of critical analysis by both disciplines. Contemporary sculpture has played a key role in this dialogue. The essays in this volume, by art historians, archaeologists and artists, take the intersection between sculpture and archaeology as the prelude for analysis, examining the metaphorical and conceptual role of archaeology as subject matter for sculptors, and the significance of sculpture as a three-dimensional medium for exploring historical attitudes to archaeology.
