*Power and Crime*

Nov 18 2021 This book provides an analysis of the two concepts of power and crime and posits that criminologists can learn more about these concepts by incorporating ideas from disciplines outside of criminology.

Although arguably a 'rendezvous' discipline, Vincenzo Ruggiero argues that criminology can gain much insight from other fields such as the political sciences,

ethics, social theory, critical legal studies, economic theory, and classical literature.

In this book Ruggiero offers an authoritative synthesis of a range of intellectual conceptions of crime and power, drawing on the works and theories of classical, as well as contemporary thinkers, in the above fields of knowledge, arguing that criminology can 'humbly' renounce claims to intellectual

independence and adopt notions and perspectives from other disciplines.

The theories presented locate the crimes of the powerful in different disciplinary contexts and make the book essential reading for academics and students involved in the study of criminology, sociology, law, politics and philosophy.

[Who Are the Criminals?](#) Sep 16 2021 How did the United States go from being a country that tries to rehabilitate street criminals and prevent white-collar

crime to one that harshly punishes common lawbreakers while at the same time encouraging corporate crime through a massive deregulation of business? Why do street criminals get stiff prison sentences, a practice that has led to the disaster of mass incarceration, while white-collar criminals, who arguably harm more people, get slaps on the wrist--if they are prosecuted at all? In [Who Are the Criminals?](#), one of America's leading criminologists provides new answers to these vitally important questions by telling how the politicization of

crime in the twentieth century transformed and distorted crime policymaking and led Americans to fear street crime too much and corporate crime too little. John Hagan argues that the recent history of American criminal justice can be divided into two eras--the age of Roosevelt (roughly 1933 to 1973) and the age of Reagan (1974 to 2008). A focus on rehabilitation, corporate regulation, and the social roots of crime in the earlier period was dramatically reversed in the later era. In the age of Reagan, the focus shifted to the harsh treatment of street crimes,

especially drug offenses, which disproportionately affected minorities and the poor and resulted in wholesale imprisonment. At the same time, a massive deregulation of business provided new opportunities, incentives, and even rationalizations for white-collar crime--and helped cause the 2008 financial crisis and subsequent recession. The time for moving beyond Reagan-era crime policies is long overdue, Hagan argues. The understanding of crime must be reshaped and we must reconsider the relative harms and punishments of street and

corporate crimes. In a new afterword, Hagan assesses Obama's policies regarding the punishment of white-collar and street crimes and debates whether there is any evidence of a significant change in the way our country punishes them. *Pockets of Crime* Jan 09 2021 Why, even in the same high-crime neighborhoods, do robbery, drug dealing, and assault occur much more frequently on some blocks than on others? One popular theory is that a weak sense of community among neighbors can create conditions more hospitable for criminals, and

another proposes that neighborhood disorder—such as broken windows and boarded-up buildings—makes crime more likely. But in his innovative new study, Peter K. B. St. Jean argues that we cannot fully understand the impact of these factors without considering that, because urban space is unevenly developed, different kinds of crimes occur most often in locations that offer their perpetrators specific advantages. Drawing on Chicago Police Department statistics and extensive interviews with both law-abiding citizens and criminals in one of the city's highest-

crime areas, St. Jean demonstrates that drug dealers and robbers, for example, are primarily attracted to locations with businesses like liquor stores, fast food restaurants, and check-cashing outlets. By accounting for these important factors of spatial positioning, he expands upon previous research to provide the most comprehensive explanation available of why crime occurs where it does.

**Crime And Punishment** Apr 11 2021 A few words about Dostoevsky himself may help the English reader to understand his work. Dostoevsky was the son of a doctor. His parents were very hard-working and deeply religious people, but so poor that they lived with their five children in only

two rooms. The father and mother spent their evenings in reading aloud to their children, generally from books of a serious character. Though always sickly and delicate Dostoevsky came out third in the final examination of the Petersburg school of Engineering. There he had already begun his first work, "Poor Folk." This story was published by the poet Nekrassov in his review and was received with acclamations. The shy, unknown youth found himself instantly something of a celebrity. A brilliant and successful career seemed to open before him, but those hopes were soon dashed. In

1849 he was arrested.

**After the Crime**

Jun 25 2022 This book examines a victim-offender dialogue program that offers victims of severe violence an opportunity to meet face-to-face with their incarcerated offenders. Using interview data, it follows the harrowing stories of crime and violence, ultimately moving beyond story-telling to provide both an accessible analysis of restorative justice and evidence that the program has significantly helped the victims. It also looks at how the program has impacted offenders, many of whom have also experienced positive changes in

their lives in terms of creating greater accountability and greater victim empathy.

### **Crime in Texas**

Jan 27 2020 The Texas criminal justice system has come a long way since the early 1990s, when a vicious crime spree by paroled murderer Kenneth McDuff convinced lawmakers and citizens that the system had broken down. In this book, District Attorney Ken Anderson describes major reforms that followed the McDuff case as he provides a complete overview of the criminal justice system in Texas. Using simple language that any citizen can understand,

Anderson describes all aspects of the system--officials (police, prosecutors, judges), criminal procedure, criminal law, criminal punishments, victims' rights, and the juvenile system. He illustrates his points with real-life stories of crime and punishment. Throughout the book, Anderson emphasizes two facts--that crime prevention programs, stricter law enforcement, and increased prison space have dramatically lowered the crime rate in Texas and that citizen activism is very effective in bringing reform to the criminal justice system. This book will be essential reading for

everyone--public and professional--concerned with criminal justice in Texas.

### **The Scene of the Crime**

Oct 18 2021 Twelve extraordinary tales of crime and punishment: a collection of true crime writing by New Zealand's award-winning master of non-fiction. A court is a chamber of questions. Who, when, why, what happened and exactly how -- these are issues of psychology and the soul, they're general to the human condition, with its infinite capacity to cause pain. A brutal murder of a wife and daughter ... A meth-fuelled Samurai sword

attack ... A banker tangled in a hit-and-run scandal ... A top cop accused of rape ... A murder in the Outback ... A beloved entertainer's fall from grace ... In the hands of award-winning journalist and author Steve Braunias these and other extraordinary cases become more than just courtroom dramas and sensational headlines. They become a window onto another world -- the one where things go badly wrong, where once invisible lives become horrifyingly visible, where the strangeness just beneath the surface is revealed. Acutely observed, brilliantly written, and with the Mark Lundy case as its riveting

centrepiece, this collection from the courts and criminal files of the recent past depicts a place we rarely enter, but which exists all around us. The Crime of Conspiracy in International Criminal Law Nov 06 2020 This book looks at the relevance of conspiracy in international criminal law. It establishes that conspiracy was introduced into international criminal law for purposes of prevention and to combat the collective nature of participation in commission of international crimes. Its use as a tool of accountability has, however, been

affected by conflicting conceptual perceptions of conspiracy from common law and civil law countries. This conflict is displayed in the decisions on conspiracy by the international criminal tribunals, and finally culminates into the exclusion of punishment of conspiracy in the Rome Statute. It is questionable whether this latest development on the law of conspiracy was a prudent decision. While the function of conspiracy as a mode of liability is satisfactorily covered by the modes of participation in the Rome Statute, its function as a purely

inchoate crime used to punish incomplete crimes is missing. This book creates a case for inclusion in the Rome Statute, punishment of conspiracies involving international crimes that do not extend beyond the conceptual stage, to reinforce the Statute's purpose of prevention. The conspiracy concept proposed is one that reflects the characteristics acceptable under both common law and civil law systems.

**The Crime of Punishment** Mar 11 2021 One can not understand the Sixties without understanding the Fifties. The Fifties were the first time the American youth

had excess freedom. Before the 50's they worked on the family farm; dusk till dawn, slaved in the sweat shops, 12 ours a day, six days a week; starved in the depression; and fought not knowing it they would be alive the next day in World War II and the Korean War. Than, suddenly, came the fifties. First there were the beatniks lead by their spiritual leader Williams Burrough, than the "bad boys of rock and roll Elvis, Johnny Cochran, and Jerry Lee Lewis prevailed. This excess freedom, led to freedom to think, freedom to question, freedom to challenge. In the sixties, the peaceful non-violent Civil

Rights Movement, progressed to the Black Power and the Black Panthers. The Civil Rights Movement was followed by the creeping involvement in Vietnam, first with military advisors, than massive troop deployments to Vietnam resulting in death, violence, destruction, and then disillusion. And complementing the war, initially, the educational teach-ins led to massive antiwar demonstrations, to the Weathermen busting windows on Michigan Ave and planting bombs in the Capital. This all digressed to the " second civil war" which recently resurfaced with the Iraq War, I afraid now is progressing

to the "third civil war". Throughout the book we follow the characters lives from romantic innocence to reality to Expressionism. Some fighting in Vietnam, some protesting the war, some marching for civil rights, friendships destroyed and than repaired. Some lives lost, some destroyed, some survived, but all caught up in the hubris characterized by a gross failure of governmental leadership. Those betrayed the most have their names on a black granite wall in Washington DC.

### **Gender, Crime and Criminal**

**Justice** Jun 01 2020

This book provides a lucid and highly

acclaimed introduction to gender issues in crime and criminal justice, central to any understanding of crime and criminal justice policy and practice. This second edition has been updated to take full account of recent developments, particularly in the areas of policing, crime prevention, restorative justice and legislation relating to sexual offences and the nature and impact of crime on women – in particular the Sexual Offences Act 2003. Gender, Crime and Criminal Justice is divided into three main sections. The first considers different ways of theorising about gender and the relative impact

of this on thinking about crime and criminal victimisation; the second considers some of the evidence in relation to people's gendered experiences of crime and criminal victimisation; the third considers how those working within the criminal justice system, and the policies that are put in place, work to sustain or change those experiences of crime and criminal victimisation in relation to gender. *Theories of Crime* Dec 28 2019 Presenting a clear, comprehensive review of theoretical thinking on crime, this book encourages students to develop a deeper

understanding of classic and contemporary theories and provides an interdisciplinary approach to criminology through the contributions of sociology, psychology and biology. **State Criminality**  
Feb 19 2022 State crimes are historically and contemporarily ubiquitous and result in more injury and death than traditional street crimes such as robbery, theft, and assault. Consider that genocide during the 20th century in Germany, Rwanda, Darfur, Albania, Turkey, Ukraine, Cambodia, Bosnia-Herzegovina, and other regions claimed the lives of tens of millions and rendered many

more homeless, imprisoned, and psychologically and physically damaged. Despite the gravity of crimes committed by states and political leaders, until recently these harms have been understudied relative to conventional street crimes in the field of criminology. Over the past two decades, a growing number of criminologists have conducted rigorous research on state crime and have tried to disseminate it widely including attempts to develop courses that specifically address crimes of the state. Referencing a broad range of cases of state crime and international institutions of

control, *State Criminology* provides a general framework and survey-style discussion of the field for teaching undergraduate and graduate students, and serves as a useful general reference point for scholars of state crime. *Darfur and the Crime of Genocide* Jul 03 2020 In 2004, the State Department gathered more than a thousand interviews from refugees in Chad that verified Colin Powell's U.N. and congressional testimonies about the Darfur genocide. The survey cost nearly a million dollars to conduct and yet it languished in the archives as the

killing continued, claiming hundreds of thousands of murder and rape victims and restricting several million survivors to camps. This book for the first time fully examines that survey and its heartbreaking accounts. It documents the Sudanese government's enlistment of Arab Janjaweed militias in destroying black African communities. The central questions are: Why is the United States so ambivalent to genocide? Why do so many scholars deemphasize racial aspects of genocide? How can the science of criminology advance understanding and

protection against genocide? This book gives a vivid firsthand account and voice to the survivors of genocide in Darfur.

**Cheap on Crime**

Oct 06 2020 After forty years of increasing prison construction and incarceration rates, winds of change are blowing through the American correctional system. The 2008 financial crisis demonstrated the unsustainability of the incarceration project, thereby empowering policy makers to reform punishment through fiscal prudence and austerity. In *Cheap on Crime*, Hadar Aviram draws on years of archival and journalistic

research and builds on social history and economics literature to show the powerful impact of recession-era discourse on the death penalty, the war on drugs, incarceration practices, prison health care, and other aspects of the American correctional landscape.

Indemnity to recent films like *Traffic* and *Thelma & Louise*, Nicole Rafter and Michelle Brown show that criminological theory is produced not only in the academy, through scholarly research, but also in popular culture, through film. *Criminology Goes to the Movies* connects with ways in which students are already thinking criminologically through engagements with popular culture, encouraging them to use the everyday world as a vehicle for theorizing and understanding both crime and perceptions of criminality. The first work to bring a systematic and sophisticated criminological

perspective to bear on crime films, Rafter and Brown's book provides a fresh way of looking at cinema, using the concepts and analytical tools of criminology to uncover previously unnoticed meanings in film, ultimately making the study of criminological theory more engaging and effective for students while simultaneously demonstrating how theories of crime circulate in our mass-mediated worlds. The result is an illuminating new way of seeing movies and a delightful way of learning about criminology. Instructor's Guide **The Crime of All Crimes** Dec 20 2021 Cambodia.

Rwanda. Armenia. Nazi Germany. History remembers these places as the sites of unspeakable crimes against humanity, and indisputably, of genocide. Yet, throughout the twentieth century, the world has seen many instances of violence committed by states against certain groups within their borders—from the colonial ethnic cleansing the Germans committed against the Herero tribe in Africa, to the Katyn Forest Massacre, in which the Soviets shot over 20,000 Poles, to anti-communist mass murders in 1960s Indonesia. Are mass crimes against humanity like these still genocide? And how

can an understanding of crime and criminals shed new light on how genocide—the “crime of all crimes”—transpires? In *The Crime of All Crimes*, criminologist Nicole Rafter takes an innovative approach to the study of genocide by comparing eight diverse genocides—large-scale and small; well-known and obscure—through the lens of criminal behavior. Rafter explores different models of genocidal activity, reflecting on the popular use of the Holocaust as a model for genocide and ways in which other genocides conform to different patterns. For instance, Rafter

questions the assumption that only ethnic groups are targeted for genocidal “cleansing,” and she also urges that actions such as genocidal rape be considered alongside traditional instances of genocidal violence. Further, by examining the causes of genocide on different levels, Rafter is able to construct profiles of typical victims and perpetrators and discuss means of preventing genocide, in addition to delving into the social psychology of genocidal behavior and the ways in which genocides are brought to an end. A sweeping and innovative

investigation into the most tragic of events in the modern world, *The Crime of All Crimes* will fundamentally change how we think about genocide in the present day. *Imagining Crime*  
May 01 2020 This book offers an original and challenging reading of the crimino-legal complex' - criminology, criminal justice, criminal law, the media and everyday experiences - in the light of cultural studies and feminist theory. Through an exploration of the crisis engendered by the failure of the crimino-legal complex to solve the problems of crime and criminality, Alison Young exposes the

cultural dimension of its institutions and practices. She analyzes the far-reaching effects of the cultural value given to crime, showing it to be rooted in a powerful nexus of the body, language, the community and everyday life. *Imagining Crime* examines a number of key events and issues which have signalled shifts in the representation of crime. These include: criminology's resistance to feminist intervention; the pleasures of reading detective fiction; ambiguities of victimization and social justice in the city; sacrificial structures in the law's response to conjugal homicide;

policing the ethnicity of the illegal' immigrant; defensive responses to the limits of representation in the Bulger affair; the governmental strategies of campaigns against single mothers; and the fatalism of the spectacle of HIV/AIDS in criminal justice policy.

#### CRIME SCENE

STAGING Apr 23

2022 This unique text has been written as a practical reference for detectives, crime scene investigators, and prosecutors on how to recognize a staged scene and how this offender behavior could be used as evidence in subsequent trials. The book is designed to help

those actively engaged in conducting criminal investigations identify the red flags or those common findings at a crime scene that point to the scene being staged or altered and thereby assist the investigative process. The text is not only research based but also includes the authors' 30-year experience and personal observations in conducting hundreds of different crime scene investigations ranging from homicide and death, burglary and other property crimes, to rape and other sexual crimes. This experience also includes interviewing

hundreds of victims and suspects, and conducting investigations from initiation of cases through prosecution. The authors have located hundreds of examples of staging and have included many of them as case studies throughout the text. Many of the case studies presented are based on the authors' personal involvement in them. In addition to defining and categorizing the various aspects of staging, the reader is also introduced to new terminology describing the different elements of staging based on offender motive and the dynamics of the events. Other major discussions include primary and

secondary staging as well as the two subcategories of primary staging: premeditated and ad hoc staging. Staging by individuals other than the offender and victim, described as tertiary/incidental scene alterations, are included as are several chapters on a variety of crimes and how to identify the red flags relevant to them. A final chapter is written especially for prosecutors and offers suggestions and references on how the concept of staging might be introduced in court. A very thorough Appendix provides reviews of many appellate court decisions from across the U.S. and Canada specifically

addressing issues of staging. The Crime of Aggression in International Criminal Law Aug 23 2019 Since after the Second World War, the crime of aggression is - along with genocide, crimes against humanity and war crimes - a "core crime" under international law. However, despite a formal recognition of aggression as a matter of international criminal law and the reinforcement of the international legal regulation of the use of force by States, numerous international armed conflicts occurred but no one was ever prosecuted for aggression since 1949. This book comprehensively

analyses the historical development of the criminalisation of aggression, scrutinises in a detailed manner the relevant jurisprudence of the Nuremberg and Tokyo Tribunals as well as of the Nuremberg follow-up trials, and makes proposals for a more successful prosecution for aggression in the future. In identifying customary international law on the subject, the volume draws upon a wealth of applicable sources of national criminal law and puts forward a useful classification of States' legislative approaches towards the criminalisation of aggression at the

national level. It also offers a detailed analysis of the current international legal regulation of the use of force and of the Rome Statute's substantive and procedural provisions pertaining to the exercise of the International Criminal Court's jurisdiction with respect to the crime of aggression, after 1 January 2017.

### Comic Book Crime

Sep 28 2022

Superman, Batman, Daredevil, and Wonder Woman are iconic cultural figures that embody values of order, fairness, justice, and retribution.

Comic Book Crime digs deep into these and other celebrated characters, providing a comprehensive understanding of crime and justice in contemporary American comic books. This is a world where justice is delivered, where heroes save

ordinary citizens from certain doom, where evil is easily identified and thwarted by powers far greater than mere mortals could possess. Nickie Phillips and Staci Strobl explore these representations and show that comic books, as a historically important American cultural medium, participate in both reflecting and shaping an American ideological identity that is often focused on ideas of the apocalypse, utopia, retribution, and nationalism. Through an analysis of approximately 200 comic books sold from 2002 to 2010, as well as several years of immersion in comic book fan culture,

Phillips and Strobl reveal the kinds of themes and plots popular comics feature in a post-9/11 context. They discuss heroes' calculations of "deathworthiness," or who should be killed in meting out justice, and how these judgments have as much to do with the hero's character as they do with the actions of the villains. This fascinating volume also analyzes how class, race, ethnicity, gender, and sexual orientation are used to construct difference for both the heroes and the villains in ways that are both conservative and progressive. Engaging, sharp, and insightful,

Comic Book Crime is a fresh take on the very meaning of truth, justice, and the American way. Instructor's Guide **Art & Crime** Aug 04 2020 A thrilling, eye-popping look at true crime in the billion-dollar art world. The art world is one of the most secretive of global businesses, and the list of its crimes runs long and deep. Today, with prices in the hundreds of millions for individual artworks, and billionaires' collections among the most conspicuous and liquid of their assets, crime is more rampant than ever in this largely unregulated universe. Increased prices and globalization have

introduced new levels of fraud and malfeasance into the art world-- everything from "artnapping," in which an artwork is held hostage and only returned for a ransom, to forgery and tax fraud. However, the extent of the economic and cultural damage that results from criminality in the global art scene rarely comes to light. The stories of high-stakes, brazen art crimes told by art experts Stefan Koldehoff and Tobias Timm are by turns thrilling, disturbing, and unbelievable (the imagination for using art to commit crimes seems boundless). The authors also provide a well-

founded analysis of what needs to change in the art market and at museums. From the authors of *False Pictures, Real Money* (about the Beltracchi art forgery case), *Art and Crime* includes a chapter on art owned by Donald Trump. It is a thoroughly researched, explosive, and highly topical book that uncovers the extraordinary and multifarious thefts of art and cultural objects around the world.

*Punishment Without Crime* May 25 2022 A revelatory account of the misdemeanor machine that unjustly brands millions of Americans as criminals

*Punishment Without Crime* offers an urgent new interpretation of inequality and injustice in America by examining the paradigmatic American offense: the lowly misdemeanor. Based on extensive original research, legal scholar Alexandra Natapoff reveals the inner workings of a massive petty offense system that produces over 13 million cases each year. People arrested for minor crimes are swept through courts where defendants often lack lawyers, judges process cases in mere minutes, and nearly everyone pleads guilty. This misdemeanor machine starts

punishing people long before they are convicted; it punishes the innocent; and it punishes conduct that never should have been a crime. As a result, vast numbers of Americans -- most of them poor and people of color -- are stigmatized as criminals, impoverished through fines and fees, and stripped of drivers' licenses, jobs, and housing. For too long, misdemeanors have been ignored. But they are crucial to understanding our punitive criminal system and our widening economic and racial divides. A Publishers Weekly Best Book of 2018

*Aggression* Mar 23 2022 This book presents a selection of revised and updated papers presented in September 2018 at the International Conference Rethinking the Crime of Aggression: International and Interdisciplinary Perspectives, which was held in Marburg, Germany, and hosted by the International Research and Documentation Centre for War Crimes Trials (ICWC). In light of the activation of the jurisdiction of the International Criminal Court concerning the crime of aggression, international experts from various disciplines

such as law, history, the social sciences, psychology and economics came together to enhance the understanding of this complex and challenging matter and thereby opened a cross-disciplinary dialogue regarding aggressive war and the crime of aggression: a dialogue that not only addresses the historical genesis of the current situation, the content of the new aggression provisions, their implementation in practice and their possible regulatory effects, but also instigates perspectives for investigating future developments and issues. Stefanie Bock is Professor of Criminal Law,

Criminal Procedure, International Criminal Law and Comparative Law in the Department of Law at the Philipps University of Marburg in Germany and Co-Director of the International Research and Documentation Centre for War Crimes Trials.
