The Road to the New Constitution Jan 20 2022

Horizon Dec 07 2020

Land Politics Oct 05 2020 "This book examines the struggle to control land in Africa through the lens of land titling in Zambia and Senegal. Contrary to standard wisdom portraying titling as an inevitable product of economic development, this book traces its distinctly political logic, showing that local actors empowered by informality act to preserve customary property rights - even when land values and demand are high. The book's analysis centers on customary institutions and their leaders, customary authorities or "chiefs," and how the strength of customary institutions and a citizen's position within them shape land tenure outcomes. Examining sub-national patterns within two very different countries, it reveals a common pattern in which variations in the ability of local institutions to retain power, not state capacity, determine state building outcomes. Based on extensive fieldwork, this book contributes new insight into our understandings of the political determinants of property rights and the persistence of institutional legacies"--

Recent Trends in Life Sciences Feb 27 2020 The combination of multidisciplinary research in plants, animals, microorganisms and their interactions with molecular biology, genetic engineering approaches and advances in cell biology research has broadened the horizons of the life sciences. This book deals with recent trends in the life sciences and will be beneficial for postgraduate students and researchers.

Dinner With Mugabe Oct 24 2019 This penetrating, timely portrait of Robert Mugabe is the psychobiography of a man whose once-brilliant career has ruined Zimbabwe and cast shame on the African continent. Heidi Holland's tireless investigation begins with her having dinner with Mugabe, the freedom fighter, and ends in a searching interview with Zimbabwe's president more than 30 years later. The author charts Mugabe's gradual self-destruction, and uncovers the complicity of some of the most respectable international players in the Zimbabwe tragedy. Probing the mystery of Africa's loyalty to one of its worst dictators, Holland explores the contradictions that cloud the

life of the man who had embodied a continent's promise.

One Zambia, Many Histories Aug 03 2020 In contrast to the rich tradition of academic analysis and understanding of the pre-colonial and colonial history of Zambia, the trajectory of post-colonial Zambia has been all but ignored by historians. The assumptions of developmentalism, the cultural hegemony of United National Independence Party orthodoxy and its conflation with national interests, and a narrow focus on Zambia's diplomatic role in Southern African affairs, have all contributed to a dearth of studies centring on the diverse lived experiences of Zambians.

Zambia Law Reports Aug 27 2022 Vols. for 1972-1973 contain selected judgments of the Court of Appeal for Zambia, and other courts; 1974-1975 of the Supreme Court of Zambia and the High Court of Zambia.

Field manual for African archaeology Nov 25 2019 "This manual aims at explaining essential concepts pertaining to the practice of conducting archaeological field work in Africa. No fewer than 63 authors draw on their practical experience in the field to cover specific topics. It seeks to provide concise and readable notes that can be consulted in the field. Each chapter corresponds to a specific phase in the investigative process, from locating and excavating a site, to cataloguing and interpreting findings, and then publishing the results." --Home page

Development-Induced Displacement and Resettlement Jan 26 2020

This book explores the issue of development-induced resettlement, with a particular emphasis on the humanitarian, legal, and social aspects of this problem. Today, so-called 'development-induced displacement and resettlement' (DIDR) is one of the dominant causes of internal spatial mobility worldwide. Each year over 15 million people are forced to abandon their homes to make space for economic development infrastructure. The construction of dams and irrigation projects, the expansion of communication networks, urbanization and re-urbanization, the extraction and transportation of mineral resources, forced evictions in urban areas, and population redistribution schemes count among the many possible causes. Terminski aims to present the issue of development-caused displacement as a highly diverse, global social problem occurring in all regions of the world. As a human rights issue it poses a challenge to public international law and to institutions providing humanitarian assistance. A significant part of this book is devoted to the current dynamics of development-caused resettlement in Europe, which has been neglected in the academic literature so far.

Computational Approaches to Energy Materials Mar 29 2020 The development of materials for clean and efficient energy generation and storage is one of the most rapidly developing, multi-disciplinary areas of contemporary science, driven primarily by concerns over global warming, diminishing fossil-fuel reserves, the need for energy security, and increasing consumer demand for portable electronics.

Computational methods are now an integral and indispensable part of the materials characterisation and development process.

Computational Approaches to Energy Materials presents a detailed survey of current computational techniques for the development and optimization of energy materials, outlining their strengths, limitations, and future applications. The review of techniques includes current methodologies based on electronic structure, interatomic potential and hybrid methods. The methodological components are integrated into a comprehensive survey of applications, addressing the major themes in energy research.

Topics covered include: • Introduction to computational methods and approaches • Modelling materials for energy generation applications: solar energy and nuclear energy • Modelling materials for storage applications: batteries and hydrogen • Modelling materials for energy conversion applications: fuel cells, heterogeneous catalysis and solid-state lighting • Nanostructures for energy applications This full colour text is an accessible introduction for newcomers to the field, and a valuable reference source for experienced researchers working on computational techniques and their application to energy materials.

Thoracic Malignancies Apr 30 2020 Thoracic Malignancies: Thoracic Malignancies is the first title in Radiation Medicine Rounds. These tumors take more lives than any others and they are among the most preventable of tumors. Thus it is crucial for the practitioner to be up-to-date on the latest insights regarding their management. Thoracic Malignancies addresses the multi-disciplinary nature of the care of these tumors. There is representation from radiation oncology, medical oncology, and surgery ensuring a well-rounded summarization of current practice. Included are chapters on lung cancer, esophageal cancer, and thymomas providing coverage of the vast majority of thoracic tumors. The multi-disciplinary nature of the articles provides readers with an up-to-date summary and a well-rounded review regarding these tumors and their care. Expert authors provide reviews and assessments of the most recent data and its implications for current clinical practice, along with insights into emerging new trends of importance for the near future.

About the Series Radiation Medicine Rounds is an invited review publication providing a thorough analysis of new scientific, technologic, and clinical advances in all areas of radiation medicine. There is an emphasis throughout on multidisciplinary approaches to the specialty, as well as on quality and outcomes analysis. Published three times a year Radiation Medicine Rounds provides authoritative, thorough assessments of a wide range of hot topics and emerging new data for the entire specialty of radiation medicine. Features of Radiation Medicine Rounds include: Editorial board of nationally recognized experts across the spectrum of radiation medicine In-depth, up-to-date expert

reviews and analysis of major new developments in all areas of Radiation Medicine Issues edited by an authority in specific subject area Focuses on major topics in Radiation Medicine with in-depth articles covering advances in radiation science radiation medicine technology, radiation medicine practice, and assessment of recent quality and outcomes studies Emphasizes multidisciplinary approaches to research and practice

Infectious Disease Epidemiology Jul 02 2020 Infectious Disease Epidemiology is a concise reference guide which provides trainees and practicing epidemiologists with the information that they need to understand the basic concepts necessary for working in this specialist area. Divided into two sections, part one comprehensively covers the basic principles and methods relevant to the study of infectious disease epidemiology. It is organised in order of increasing complexity, ranging from a general introduction to subjects such as mathematical modelling

and sero-epidemiology. Part two examines key major infectious diseases that are of global significance. Grouped by their route of transmission for ease of reference, they include diseases that present a particular burden or a high potential for causing mortality. This practical guide will be essential reading for postgraduate students in infectious disease epidemiology, health protection trainees, and practicing epidemiologists.

Gender and Judging Dec 27 2019 Does gender make a difference to the way the judiciary works and should work? Or is gender-blindness a built-in prerequisite of judicial objectivity? If gender does make a difference, how might this be defined? These are the key questions posed in this collection of essays, by some 30 authors from the following countries; Argentina, Cambodia, Canada, England, France, Germany, India, Israel, Italy, Ivory Coast, Japan, Kenya, the Netherlands, the Philippines, South Africa, Switzerland, Syria and the United States. The contributions draw on various theoretical approaches, including gender, feminist and sociological theories. The book's pressing topicality is underlined by the fact that well into the modern era male opposition to women's admission to, and progress within, the judicial profession has been largely based on the argument that their very gender programmes women to show empathy, partiality and gendered prejudice - in short essential qualities running directly counter to the need for judicial objectivity. It took until the last century for women to begin to break down such seemingly insurmountable barriers. And even now, there are a number of countries where even this first step is still waiting to happen. In all of them, there remains a more or less pronounced glass ceiling to women's judicial careers.
