Walking Away From The Land Dec 22 2021 Walking Away from the Land focuses on the rapid cultural and climatic changes occurring at the crest of the North American continent. They are challenging the survival of our forests, grasslands, native wildlife, and our very civilization. This book details a three-summer Odyssey hiking the length of the Continental Divide Trail from the Canadian Rockies to the Mexican border. It focuses on the region's cultural and natural history, while using the author's personal history as a Peace Corps volunteer in Nepal and as an Oregon forester to underline the dangers we face as an increasingly urbanized society.

Mark Dalton: Owner/Operator Jan 29 2020 LOOKING FOR TROUBLE: Mark Dalton isn't sure if he finds trouble or if trouble finds him. But ever since his wife traded him in for a prettier model, and he traded in his Private Eye business for a Peterbilt, it seems to be everywhere he goes. In this collection of loosely interwoven who-dunnits, Edo van Belkom introduces Mark Dalton, Trucker Detective. Whether he's scooping up pretty hitchhikers with secrets, getting back goods stolen right out from under his nose, making a shady repair shop pay, or solving a racially charged, post-9/11 murder, Dalton is one busy trucker. And truth is, he wouldn't have it any other way.

The Bitterroots Jan 11 2021 A riveting new novel from New York Times bestselling and Edgar Award-winning author C. J. Box. The ties that bind can burn you. Former sheriff's investigator Cassie Dewell is trying to start her life over as in private practice. She's her own boss and answers to no one, and that's just the way she likes it after the past few tumultuous years. All that certainty changes when an old friend calls in a favor: she wants Cassie to help exonerate a man accused of assaulting a young woman from an influential family. Against her own better judgment, Cassie agrees. But out by the Bitterroot Mountains of Montana, twisted family loyalty runs as deep as the ties to the

land, and there's always something more to the story. The Kleinsassers have ruled this part of Montana for decades, and the Iron Cross Ranch is their stronghold. They want to see Blake Kleinsasser, the black sheep of the family, put away forever for the assault. As Cassie attempts to uncover the truth, she must fight against a family whose roots are tangled and deadly—as well as the ghosts of her own past that threaten to bring her down. With *The Bitterroots*, master storyteller C. J. Box delivers another searing novel of loyalty, lies, and lethal retribution.

Technologies and Approaches to Reducing the Fuel Consumption of Medium- and Heavy-Duty Vehicles Jul 05 2020 Technologies and Approaches to Reducing the Fuel Consumption of Medium- and Heavy-Duty Vehicles evaluates various technologies and methods that could improve the fuel economy of medium- and heavy-duty vehicles, such as tractor-trailers, transit buses, and work trucks. The book also recommends approaches that federal agencies could use to regulate these vehicles' fuel consumption.

Currently there are no fuel consumption standards for such vehicles, which account for about 26 percent of the transportation fuel used in the U.S. The miles-per-gallon measure used to regulate the fuel economy of passenger cars. is not appropriate for medium- and heavy-duty vehicles, which are designed above all to carry loads efficiently. Instead, any regulation of medium- and heavy-duty vehicles should use a metric that reflects the efficiency with which a vehicle moves goods or passengers, such as gallons per ton-mile, a unit that reflects the amount of fuel a vehicle would use to carry a ton of goods one mile. This is called load-specific fuel consumption (LSFC). The book estimates the improvements that various technologies could achieve over the next decade in seven vehicle types. For example, using advanced diesel engines in tractor-trailers

could lower their fuel consumption by up to 20 percent by 2020, and improved aerodynamics could yield an 11 percent reduction. Hybrid powertrains could lower the fuel consumption of vehicles that stop frequently, such as garbage trucks and transit buses, by as much 35 percent in the same time frame.
