Institutional Translation for International Governance Aug 15 2021 This volume provides a state-of-the-art overview of institutional translation issues related to the development of international law and policies for supranational integration and governance. These issues are explored from various angles in selected papers by guest specialists and findings of a large-scale research project led by the editor. Focus is placed on key methodological and policy aspects of legal communication and translation quality in a variety of institutional settings, including several comparative studies of the United Nations and European Union institutions. The first book of its kind on institutional translation with a focus on quality of legal communication, this work offers a unique combination of perspectives drawn together through a multilayered examination of methods (e.g. corpus analysis, comparative law for translation and terminological analysis), skills and working procedures. The chapters are organized into three sections: (1) contemporary issues and methods; (2) translation quality in law- and policy-making and implementation; and (3) translation and

multilingual case-law.

Hydropolitical Vulnerability and Resilience Along International Waters Mar 29 2020 Water is a unique and vital source, for which there is no substitute. Sustainable development of this rich resource in the region is complex as the distribution of water to all nations is heterogeneous, which increases the risk of being used or adapted inequitably. In recent years the sustainability discourse has broadened to include human systems. The purpose of this publication on hydropolitical vulnerability and resilience along international is to warrant broader promotion and dissemination of assessed information and data in order to support informed policy-making and provide a model for the regions that face similar water challenges.

War and Governance: International Security in a Changing World Order Dec 07 2020 An insightful and expert assessment examines how best to end—and avert—wars. • Short case studies • A survey of key institutions and sub-organizations • Maps

International Corporate Governance After Sarbanes-Oxley Jun 24 2022 "The Sabanes-Oxley Act has been one of the most significant developments in corporate and securities regulation since the New Deal. This collection of important articles would be a valuable resource for anyone seeking to understand Sabanes-Oxley's far-reaching effects on corporate governance in the United States and elsewhere." —Jesse Fried, coauthor of *Pay Without Performance: The Unfulfilled Promise of Executive Compensation* and Professor of Law at the University of California, Berkeley "The editors have assembled the latest cutting-edge research on international corporate governance by respected academics in this field. In this handbook, the editors deal with all aspects of the significant legislative changes to corporate governance regulation. It introduces the reader to the new rules that will certainly improve the reliability and the accuracy of disclosures made by corporations. The book comes at the right moment with the recent scandals such as Enron, which will educate all readers especially shareholders of corporate stock." —Komlan Sedzro, Professor of Finance, University of Quebec at Montreal "Today, corporate governance is a topic at the center of public policy debate in most industrialized countries. The range of concerns; the variety of approaches; and their tendency to converge in some areas or diverge in others (not always in the right directions) are emphatically demonstrated by these essays. There is material here of enormous interest for scholars of comparative law and economic regulation. And significantly, the presentation of essays from legal, financial, and regulatory viewpoints demonstrates the growing practical as well as theoretical utility of interdisciplinary work in this area. Professors Ali and Gregoriou are to be warmly congratulated for their skill and initiative in assembling an important publication, as well as for their own contributions to interdisciplinary scholarship." —R. P. Austin, BA, LL.M (Sydney), DPhil (Oxon), Supreme Court of New South Wales "This very international collection emphasizes the economic line of descent, while including legal and socio-legal contributions. It fills a very important gap in our empirical knowledge of corporate governance. It is accessible and comprehensive and will greatly assist readers from all relevant disciplines, who are trying to discern the shape of corporate governance as a mature field." —Dimitry Kingsford Smith, Professor of Law, University of New South Wales

Proceedings of the 3rd International Conference of Economics and Management (CIREG 2016) Volume II Feb 06 2021 This book brings together papers presented at the 3rd Conference of Research in Economics and Management (CIREG) held in Morocco in May 2016. With a focus on the challenges of SMEs and innovative solutions, they highlight the contribution of researchers in the fields of business and management, with all their micro and macro-economic aspects. They shed light on the universal scientific vision of the importance of SMEs with answers relevant to their local context and adapted to their specific national situation. The relevance of SME research lies in its heuristic value of analyzing change, rather than in constructing a category, a particularly useful empirical concept. This third volume is focused on marketing and human resources.

International Professional Practices Framework (IPPF) Sep 27 2022 The Institute of Internal Auditors' (IIA's) International Professional Practices Framework (IPPF) is the authoritative guidance

on the internal audit profession. The IPPF presents current, relevant, internationally consistent information that is required by internal audit professionals worldwide. The new IPPF features improved clarity, increased transparency, measurable accountability, a defined cycle of review for all guidance, and availability in hard copy and as a fully interactive CD-ROM.

A Dual Approach to Ocean Governance Oct 17 2021 Taking the North-East Atlantic Ocean as an example of regional practice, this book addresses the dual approach to ocean governance in international law. It examines the interaction between zonal and integrated management approaches and the conservation of marine living resources and marine biological diversity. The study examines the limitations of the traditional zonal approach and suggests new possibilities for conformity between sovereign states, international law and sustainable development.

The Oxford Handbook of Comparative Regionalism Apr 30 2020 A systematic and wide-ranging survey of the scholarship on regionalism, regionalisation, and regional governance. Unpacking the major debates, leading authors of the field synthesise the state of the art, provide a guide to the comparative study of regionalism, and identify future avenues of research.

Well Spent Nov 29 2022 Drawing on the Fund's analytical and capacity development work, including Public Investment Management Assessments (PIMAs) carried out in more than 60 countries, the new book *Well Spent: How Strong Infrastructure Governance Can End Waste in Public Investment* will address how countries can attain quality infrastructure outcomes through better infrastructure governance—an issue becoming increasingly important in the context of the Great Lockdown and its economic consequences. It covers critical issues such as infrastructure investment and Sustainable Development Goals, controlling corruption, managing fiscal risks, integrating planning and budgeting, and identifying best practices in project appraisal and selection. It also covers emerging areas in infrastructure governance, such as maintaining and managing public infrastructure assets and building resilience against climate change.

Cornell International Law Journal Aug 03 2020

The G20 and International Relations Theory Oct 05 2020 The future of the G20 is uncertain despite being developed to address the 2008 global financial crisis. This book considers the significance of the G20 by engaging various accounts of International Relations theory to examine the political drivers of this form of global governance. International Relations theory represents an array of perspectives that analyse the factors that drive the G20, how the G20 influences world politics and in what ways the G20 could or should be reformed in the future.

International Summitry and Global Governance May 24 2022 This volume is the first detailed study of the emergence of regular and frequent heads of government meetings (summits), covering the period from the mid-1970s to the early 1990s. Summit meetings of heads of government have become 'banal' in today's world. Yet they are a relatively recent practice that took off only in the mid-1970s. The aim of the book is to explore the origins of this new feature of global governance in its historical context. Why did heads of Western governments decide to regularly meet up in the European Council and the G7? What were they aiming at? How were these meetings run and what consequences did they have? How did other actors of international relations - states as well as non-state and/or transnational actors - react to this transformation? Based on newly released archival material, *International Summitry and Global Governance* investigates the rise of regular international summitry and its impact on international relations. The volume brings together the best specialists of this new field of historical enquiry in order to explore those features of global governance in their historical context, and open up an interdisciplinary dialogue with social scientists who have studied summits from their own disciplinary perspectives. This book will be of much interest to students of international history, Cold War studies, global governance, foreign policy and IR in general.

Corporate Governance and International Business Jul 26 2022 Bringing together a number of leading scholars and pioneering research, this volume explores the links between corporate governance and international business, and demonstrates how corporate governance influences the attractiveness of host countries to inward investors, as well as the internationalization strategies of

MNEs themselves.

Economia e management dell'università. La governance interna tra efficienza e legittimazione Dec 31 2022 365.742

The Italian Yearbook of International Law, Volume 18 (2008) Dec 27 2019 The Italian Yearbook of International Law aims at making accessible to the English speaking public the Italian contribution to the practice and literature of international law. Volume XVIII (2008) marks the tenth anniversary of the New Series of the IYIL. The Volume is organised in three sections. The first is thematically structured around a main topic and a series of doctrinal contributions on relevant and topical issues of international law. The feature theme of this volume is controversial territorial situations and the role of recognition and secession. The articles by Gioia and Tancredi bring valuable insights and intellectual rigour in this debate, while the piece by Serra examines the related issue of the legal consequences of the continued presence of the international civil administration in Kosovo. The other main articles provide innovative perspectives on two important issues: the status of private military companies in the law of armed conflicts (Sossai) and the recurring question of the treatment of WTO law by the European Community Courts (Gattinara). Doctrinal contributions also include a variety of notes covering timely topics such as the role of IAEA in the fight against nuclear terrorism, the controversial return by Italy of cultural treasures to Libya, and the choice of forum in human rights adjudication. The usual surveys on the activities of the ICJ, the ILC, the ECtHR, ICSID, international criminal justice, and the Italian practice occupy the rest of this section. The second section covers the Italian practice in the areas of i) judicial decisions; ii) diplomatic and parliamentary practice; iii) treaty practice; and iv) national legislation. The third section contains a systematic bibliographical index of Italian literature in the field of international law and reviews of recent books. The volume ends with an analytical index for ready consultation that includes the main judicial cases and legal instruments cited throughout the Yearbook.

Internal and External Aspects of Corporate Governance Jul 02 2020 An effective system of corporate governance has both internal and external aspects that have to be sufficiently responsive if governance is to succeed. In this book, Ahmed Naciri examines these two core aspects or the latest buzzword in business and management theory. Internal aspects include ownership structure, the board of directors and committees, internal control, risk management, transparency and financial reporting. External aspects can either be market-oriented, or can take the form of credit ranking, and/or social requirements. Due to the original orientation of the Sarbanes/Oxley Law, concentrating solely on financial disclosure and given its decisive and tremendous influence on all other similar corporate governance legislations all over the world, most writings on corporate governance have dealt with solely internal corporate governance mechanisms. This book aim is to fill up the gap by using a systemic approach and giving a global picture of the corporate governance theoretical foundations, mainly by putting the emphasis on its double dimension: internal and external.

International Standards for the Professional Practice of Internal Auditing Jan 26 2020

Internal Governance Aug 22 2019 I sistemi di controllo interno delle banche sono stati oggetto di ripetuti interventi normativi che stimolano una continua riflessione sui profili di adeguatezza e di efficienza degli assetti di governo aziendale. Il libro offre una valutazione dell'impatto delle recenti innovazioni normative ed un'analisi empirica sullo stato dell'arte e sui profili evolutivi dell'internal governance nelle principali banche operanti in Italia. Ne emergono numerosi spunti ed evidenze utili alla definizione delle strategie, delle strutture e delle politiche volte a garantire il presidio del complessivo sistema dei rischi aziendali. Ad esperti del settore, organi di vigilanza ed esponenti della comunità manageriale e delle stesse funzioni di controllo offerta una visione di insieme sulla struttura, sul funzionamento e sugli strumenti del sistema di governo e controllo dei rischi, che parte dai consigli di amministrazione e considera il ruolo specifico svolto dalle diverse funzioni di controllo interno: internal auditing, risk management, compliance e dalle altre funzioni aziendali, in una logica di complessivo coordinamento e interdipendenza dei processi e delle decisioni.

International Migrations and Local Governance Apr 10 2021 This volume provides a

comprehensive overview of the role of local governments around the world in the management of the migration, integration and development nexus. Drawing on case studies from the Global North and South, this comparative work fills a lacuna in the existing literature which has focused largely on migration as addressed by European and North American cities. Further, it widens the current debate by confronting northern experiences with attitudes and strategies observed in sending countries; clearly demonstrating that international mobility has become a global issue for cities at both end of the migration spectrum. This innovative work will provide a valuable resource for students and scholars working in the social sciences, public policy and development; in addition to practitioners and policymakers.

International Corporate Governance Mar 10 2021 This compilation serves a particularly useful purpose by presenting a full range of fascinating case studies. The editor thus enables each reader to assimilate the particulars in his own parlance, thus avoiding the almost insoluble problem of international corporate governance namely that each country uses the same words, but with utterly different meanings. Obviously, this problem has inhibited constructive conversation. After digesting these case studies, one is encouraged to derive certain generalized conclusions, among which are no matter what the terminology, the integrity of publicly traded securities depends on transparency and enforceable accountability of manager to owner. Robert Monks, Lens Governance Advisors, US This collection of thoroughly researched and well-written case studies of the governance of companies in nine countries demonstrates how far away we are from convergence in corporate governance systems. Differences in ownership structures, board composition, financial markets, accounting standards, takeover defences, legal systems, societal and corporate cultures, and even political involvement, are highlighted in this splendid collection. The book demonstrates the importance of the few core concepts that are emerging in the field, such as greater transparency, independence in non-executive directors, and the need for more effective governance. The consideration of case studies is presently the best way to understand the reality of corporate governance around the world. This book offers valuable insights to students, teachers and practitioners of the subject. R.I. (Bob) Tricker, Honorary Professor, University of Hong Kong and Founder Editor, Corporate Governance an international review Corporate governance has become a global phenomenon. This book highlights, through various case studies, how corporate governance has evolved in a number of countries around the world. The international cast of contributors, from varying professional backgrounds including academics, lawyers and company directors, focus on different regions around the globe, reflecting various ownership structures, legal systems, and political and cultural aspirations. Some of the case studies used include: Standard Life; Telecom Italia; and Eskom. Academics, directors and practitioners will find this book valuable for its insights into corporate governance developments in different legal environments and different business forms. It will also be immensely useful to postgraduate and undergraduate students for the up-to-date case studies on corporate governance, which will add depth and real world meaning to their studies.

ICMLG2015-The 3rd International Conference on Management, Leadership

and Governance Feb 18 2022 The conference committee encourages contributions on this wide range of topics through the use of a variety of rigorous approaches, including theoretical and empirical papers employing qualitative, quantitative and critical methods. Action-based research, case studies and work-in-progress/posters are enthusiastically welcomed. PhD research, proposals for roundtable discussions, practitioner contributions and product demonstrations based on the conference themes are also invited.

The European Union in International Organisations and Global Governance Jul 14 2021 The European Union is a key participant in international organisations with its involvement taking different forms, ranging from full membership to mere observer. Moreover, there is also not only one status of observer, but different ones depending on the constituent charters of the organisations. This book provides a comprehensive overview of the participation of the EU in five international organisations: the UN, the ILO, the WTO, the WHO and the WIPO. It identifies its role and influence in diverse areas of global governance, such as foreign policy, peace, human rights, social rights, trade, health and intellectual property. EU and international experts, diplomats and scholars have contributed to this book to give an overview of the different aspects linked to the participation of the EU in these organisations and to the coordination that takes place internally with its Member States. They also examine the EU's actual influence in the various areas and its contribution to global governance. The combination of these two dimensions allows the work to identify the strengths and weaknesses of the participation of the EU in these five international organisations. The book provides valuable insights for scholars, policymakers and is useful for representatives of other international organisations and civil society actors.

Meeting Global Challenges through Better Governance International Co-operation in Science, Technology and Innovation Oct 29 2022 Based on case studies, this book presents lessons and good practices on a range of governance mechanisms used for international co-operation in STI to address global challenges.

Standards for Internal Control in the Federal Government Nov 25 2019 Policymakers and program managers are continually seeking ways to improve accountability in achieving an entity's mission. A key factor in improving accountability in achieving an entity's mission is to implement an effective internal control system. An effective internal control system helps an entity adapt to shifting environments, evolving demands, changing risks, and new priorities. As programs change and entities strive to improve operational processes and implement new technology, management continually evaluates its internal control system so that it is effective and updated when necessary. Section 3512 (c) and (d) of Title 31 of the United States Code (commonly known as the Federal Managers' Financial Integrity Act (FMFIA)) requires the Comptroller General to issue standards for internal control in the federal government.

International Trends in University Governance Sep 15 2021 Governance is becoming increasingly important in universities just as it is in the wider world of commerce and banking. Historically, universities were run by their academic communities but as mass higher education has

taken root, as university research has become a critical element in national economies and as the demand for more accountability both financial and in academic performance has grown, pressure has mounted for a 'modernisation' of governance structures. One aspect of 'modernisation', particularly important in many European systems, and in Japan, has been the decision by governments to give institutions greater autonomy, more control over their budgets and legal responsibility for the employment of their staff. International trends to introduce greater competition between institutions, to encourage greater institutional differentiation and give greater play to market forces has led to an emphasis on leadership, a more systematic involvement of external stakeholders and a more 'corporate style of governance. At the same time this has often led to a sense of loss of collegiality, a redistribution of authority and a growing gap between the 'centre' and the 'periphery' within universities. This book analyses governance change in nine major higher education systems, Australia, Finland, France, Germany, Italy, Japan, Norway, the UK and the USA, each account being the result of independent research by a leading authority in the field and describes how a convergence of governance structures has been mediated by the historical, cultural, political and social characteristics of the different systems. Michael Shattock is a leading authority on university governance; this study offers the most up to date account of governance reform in a range of higher education systems, an analysis of the common trends and an assessment of their impact on the idea of a university. It will be essential reading for academics, postgraduates and practitioners in higher education.

Collected Courses of the Xiamen Academy of International Law, Volume 11 (2017) Sep 23 2019 In the Collected Courses of the Xiamen Academy of International Law Hans van Loon, Former Secretary-General of The Hague Conference of Private International Law, Prof. Bimal N. Patel, Director of Gujarat National Law University, India, and Prof. Ernst-Ulrich Petersmann of the European University Institute in Florence, provide insightful, perspicacious and concise analysis of recent developments in international law .

Grassroots Global Governance Sep 03 2020 When international agreements fail to solve global problems like climate change, transnational networks attempt to address them by implementing "global ideas" -- policies and best practices negotiated at the global level-locally around the world. Grassroots Global Governance not only explains why some efforts succeed and others fail, but also why the process of implementing global ideas locally causes these ideas to evolve. Drawing on nodal governance theory, the book shows how transnational actors' success in putting global ideas into practice depends on the framing and network capacity-building strategies they use to activate networks of grassroots actors influential in local social and policy arenas. Grassroots actors neither accept nor reject global ideas as presented by outsiders. Instead, they negotiate whether and how to adapt them to fit local conditions. This contestation produces experimentation, and results in unique institutional applications of global ideas infused with local norms and practices. Grassroots actors ultimately guide this process due to their unique ability to provide the pressure needed to push the process forward. Experiments that endure are perceived as "successful," empowering those actors involved to activate transnational networks to scale up and diffuse innovative local governance models globally. These models carry local norms and practices to the international level where they challenge existing global approaches and stimulate new global governance institutions. By guiding the way global ideas evolve through local experimentation, grassroots actors reshape international actors' thinking, discourse, organizing, and the strategies they pursue globally. This makes them grassroots global governors. To demonstrate this, the book compares transnational efforts to implement local Integrated Watershed Management programs across Ecuador and shows how local experiments altered the global debate regarding sustainable development and stimulated a new global movement dedicated to changing the way sustainable development is practiced. In doing so, the book reveals the grassroots level as not merely the object of global governance, but rather a terrain where global governance is constructed.

Internal Conflict and Governance Aug 27 2022 Violence, war and internal conflicts have assumed a new intensity with the decline of the Cold War. There are over 32 civil wars going on today. Our

world may well witness over 100 million refugees in the year 2000 as a direct result of internal wars. This volume consists of case studies and theory-oriented papers dealing with Asia, Africa and Latin America and the Middle East. Taken together, they spell out implications of wide general interest, providing a comparative basis for a systematic approach to conflict transformation.

International Governance of the Arctic Marine Environment Jan 20 2022 The Arctic is particularly affected by climate change; over the past few decades, temperatures in this area have risen twice as fast as the mean global rate. The most prominent effect of global climate change in the region is the melting sea ice in the Arctic Ocean, which enables a multitude of ocean uses to be initiated and extended, such as shipping, fishing and oil and gas extraction. Unlike in the Antarctic, there is currently no single comprehensive legal regime for governance of the Arctic. Instead, the region is regulated by a patchwork of international treaties, above all the United Nations Convention on the Law of the Sea (UNCLOS), various regional and sub-regional agreements, national laws and soft-law agreements. This treatise provides an evaluation of the governance regime that regulates the use of the Arctic marine environment and its readiness to protect these fragile ecosystems in light of the consequences of climate change.

Reshaping Accounting and Management Control Systems May 12 2021 This book examines the relationship between digital innovations on the one hand, and accounting and management information systems on the other. In particular it addresses topics including cloud computing, data mining, XBRL, and digital platforms. It presents an analysis of how new technologies can reshape accounting and management information systems, enhancing their information potentialities and their ability to support decision-making processes, as well as several studies that reveal how managerial information needs can affect and reshape the adoption of digital technologies. Focusing on the four major aspects data management, information system architecture, external and internal reporting, the book offers a valuable resource for CIOs, CFOs and more generally for business managers, as well as for researchers and scholars. It is mainly based on a selection of the best papers - original double blind reviewed contributions - presented at the 2015 Annual Conference of the Italian Chapter of the Association for Information Systems (AIS).

6th International Finance Conference on Financial Crisis and Governance Apr 22 2022 Financial markets, the banking system, and the real estate, commodity and energy markets have, since 2007, been experiencing higher integration, more volatility and have undergone several shocks. More coordination is needed between G20 and market authorities. Regulators, banking supervision agencies and politicians are worried about economic growth and financial crisis. This book covers seven aspects related to financial economic issues, along with some connected topics. The first covers risk assessment, corporate governance and value creation through an appropriate risk management system. The second covers international investments, market correlation, institutional holdings and market reactions during crisis. The third part is devoted to empirical and quantitative analysis of the observed economics and finance issues. The fourth part is devoted to the role of debt in financial crisis and its impact on financial markets and the world economy. The fifth part is devoted to debt policy, free cash flows and the structure of governance. The sixth part deals with management control and the importance of communication. The last part covers Islamic finance as an alternative to conventional finance for the debt solution, the importance of the energy sector and the role of financial innovations.

Management of Radioactive Waste May 31 2020 The classification of radioactive waste varies from state to state. This results in different management procedures for each country, while following IAEA and OECD/NEA recommendations. Radioactive waste comes from numerous sources. The largest volumes are generated by the decommissioning and dismantling of nuclear facilities. Long-lived, medium- and high-activity waste - categorized as the most hazardous types of waste - are in fact largely produced by nuclear power reactors, spent fuel reprocessing plants and nuclear accidents. Final disposal of very low-activity, low-activity and very short-lived waste is well controlled. However, final solutions for certain categories, including long-lived waste, sorted waste and spent graphite waste, are not yet in place. *Management of Radioactive Waste* reviews all the

possible solutions and presents those chosen by the various states, including a chapter detailing policy on radioactive waste management, taking France as an example.

OECD Public Governance Reviews: France An international perspective on the General Review of Public Policies Dec 19 2021 The reform programme called "General Review of Public Policies" (Révision Générale des Politiques Publiques, RGPP), implemented at central government level in France in 2007, is a novel approach for OECD countries by its mode of governance, directly and continuously involving the highest state office

Promoting Justice, Human Rights and Conflict Resolution through International Law / La promotion de la justice, des droits de l'homme et du règlement des conflits par le droit international Nov 17 2021 This Liber Amicorum is published at the occasion of Judge Lucius Caflisch's retirement from a distinguished teaching career at the Graduate Institute of International Studies of Geneva, where he served as Professor of International Law for more than three decades, and where he has also held the position of Director. It was written by his colleagues and friends, from the European Court of Human Rights, from universities all around the world, from the Swiss Foreign Affairs Ministry and many other national and international institutions. The Liber Amicorum Lucius Caflisch covers different fields in which Judge Caflisch has excelled in his various capacities, as scholar, representative of Switzerland in international conferences, legal adviser of the Swiss Foreign Affairs Ministry, counsel, registrar, arbitrator and judge. This collective work is divided into three main sections. The first section examines questions concerning human rights and international humanitarian law. The second section is devoted to the international law of spaces, including matters regarding the law of the sea, international waterways, Antarctica, and boundary and territorial issues. The third section addresses issues related to the peaceful settlement of disputes, both generally and with regard to any particular means of settlement. The contributions are in both English and French.

International Business Strategy Nov 05 2020 This volume fills a gap in the international business literature, offering the perspectives of researchers who are deeply embedded in one key emerging market, India. With the global economy changing dramatically, firms from emerging markets are playing increasingly important roles in both outward and inward internationalisation. International Business Strategy offers profound insights into international business activities in this rapidly-evolving environment, in which multinational corporations from emerging markets are now influential players. Reflecting the complex nature of India itself, the chapters employ a variety of theoretical lenses to shed light on a wide range of issues encountered by Indian businesses, from some of the world's largest corporations to small, entrepreneurial firms.

Handbook on International Corporate Governance Jun 12 2021 This major Handbook provides a comprehensive analysis of the development of corporate governance across a range of countries including Australia, Germany, India, Italy, Japan, Poland, Russia, South Africa, Spain, Turkey and the UK. Whilst the stage in the corporate governance life cycle may vary from country to country, there are certain core features which emerge such as the importance of transparency, disclosure, accountability of directors and protection of minority shareholders rights. With contributions by leading academics and practitioners in the field of corporate governance, the Handbook on International Corporate Governance provides an eloquent insight into the evolution of corporate governance in countries with diverse cultural, economic and legal systems.

World Development Report 2017 Oct 24 2019 Why are carefully designed, sensible policies too often not adopted or implemented? When they are, why do they often fail to generate development outcomes such as security, growth, and equity? And why do some bad policies endure? World Development Report 2017: Governance and the Law addresses these fundamental questions, which are at the heart of development. Policy making and policy implementation do not occur in a vacuum. Rather, they take place in complex political and social settings, in which individuals and groups with unequal power interact within changing rules as they pursue conflicting interests. The process of these interactions is what this Report calls governance, and the space in which these interactions take place, the policy arena. The capacity of actors to commit and their willingness to cooperate and

coordinate to achieve socially desirable goals are what matter for effectiveness. However, who bargains, who is excluded, and what barriers block entry to the policy arena determine the selection and implementation of policies and, consequently, their impact on development outcomes. Exclusion, capture, and clientelism are manifestations of power asymmetries that lead to failures to achieve security, growth, and equity. The distribution of power in society is partly determined by history. Yet, there is room for positive change. This Report reveals that governance can mitigate, even overcome, power asymmetries to bring about more effective policy interventions that achieve sustainable improvements in security, growth, and equity. This happens by shifting the incentives of those with power, reshaping their preferences in favor of good outcomes, and taking into account the interests of previously excluded participants. These changes can come about through bargains among elites and greater citizen engagement, as well as by international actors supporting rules that strengthen coalitions for reform.
