**Peritoneal Carcinomatosis: Principles of Management Oct 27 2019 Paul Sugarbaker and his colleagues have persevered in the study and treatment of peritoneal carcinomatosis. The peritoneal cavity has many unique and incompletely appreciated properties. These properties, coupled with the biologic behavior of many cancers, results in the seeding and growth of these cancers on the peritoneum. Many of these cancers remain localized to the peritoneum only, never metastasizing to other sites. One possible reason for this may be the obstruction of the afferent lymphatics on the undersurface of the diaphragm. The mucopolysaccharides produced by many of these neoplasms are probably viscous enough to obstruct these lymphatics, leading to the syndrome of pseudomyxoma peritonei. Many of the neoplasms**

**taking residence on the peritoneum have extremely long cell-cycle times and are resistant to radiotherapy and many chemotherapeutic agents. However, much can be done for these patients - resection of primary cancers, omentectomies to reduce ascites formation, management of recurrent ascites, management of intestinal obstruction, nutritional care, and, hopefully, intraperitoneal chemotherapy. We have reviewed many of these problems in the past [1-7]. Dr. Sugarbaker and his colleagues have organized the current state of knowledge and technology for continuing use. The book provides a basis for thoughtful, prospective research planning. John S. Spratt, M. D. , F. A. C. S. The constraints imposed and the opportunities provided by the nature of the economic, political, legal, social, and demographic factors have a profound impact on the business. Management is a process by which managers continuously reinvent themselves to meet the organizational goals and global competition. A good manager must also possess a sound understanding of human behaviour to develop the most important managerial skill of empathy. This book is a first-level introduction to the field of management enabling students to understand what managers do, what skills are needed by managers, what their basic functions**

The book elaborately describes the five functions of a manager—Planning, Organizing, Human Resource Management, Leading, and Directing and Control. The book is useful for students pursuing courses in Business Management both at the undergraduate and postgraduate levels.
